

Legal & General UK Smaller Companies Trust

Unit Trust (UCITS compliant) I-Class GBP

FUND AIM

The objective of this fund is to provide growth. The fund will typically invest between 90% and 100% in company shares. The fund will invest in UK company shares from all economic sectors. Between 70% and 100% of these shares will be issued by smaller UK companies that make up the lowest 10% by size of the main UK share markets.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

This fund is in category 5 because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds, cash or commercial property.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking to grow their money in an investment which can form part of their existing savings portfolio

Performance for the I Inc unit class in GBP, launched on 17 August 2012. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund.

Past performance is not a guide to future returns. The value of your investment and any income taken from it is not guaranteed and may go up and down.

FUND SNAPSHOT

- Invests in UK-listed companies, primarily within the smallest 10% when measured by market capitalisation
- Smaller companies are some of the most dynamic in the world with significant potential for capital growth
- We believe that the inefficiency of the UK market means that fundamental company research could result in relative outperformance

KEY RISKS

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from Sterling (British Pounds). Any such investments will be impacted by exchange rate fluctuations and this may affect the value of your investment and any income from it. Currency hedging techniques may have been applied to reduce the impact of exchange rate fluctuations but may not entirely eliminate it.
- The fund invests in smaller companies. Investments in smaller companies tend to be riskier than investments in larger companies because they can: be harder to buy and sell; or go up and down in value more often and by larger amounts, especially in the short term.
- The fund could lose money if any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
