

L&G Euro High Alpha Corporate Bond Fund

SICAV (UCITS compliant) Z-Class EUR Dist

FUND AIM

The Fund aims to produce a return derived from capital growth and income by investing predominantly in Euro denominated fixed and floating rate securities.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 2 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to fluctuate.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for income or growth from an investment in fixed income securities
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you

All performance periods over a year will be annualised. Performance for the Z EUR Dist share class in EUR, launched on 08 December 2014. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund. This fund has adopted a single swinging price, this means that on any given day the single dealing price will be set at either bid, offer or somewhere in between, based on whether there was a net inflow or outflow into or out of the Fund. The past performance depicted in this factsheet is based on that dealing price and therefore may appear more volatile than it would otherwise be if we were to show the notional bid or offer performance, this is as a result of the daily swing.

Past performance is not a guide to the future.

FUND SNAPSHOT

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up. You may not get back the amount you originally invested.
- This fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
