

Legal & General
Global Inflation Linked Bond Index Fund

**Annual Manager's
Short Report
for the year ended
5 June 2017**

**EVERY
DAY
MATTERS.®**

Investment Objective and Policy

The objective of the Fund is to achieve income and capital growth in line with the performance of the Barclays World Government Ex UK Inflation Linked Bonds TR Hedged GBP Index (the “Index”) (after adjustment for management charges and taxation).

The Fund will invest predominantly in securities that are included in the Index. The Fund will be passively managed and employs a sampling strategy whereby such securities will be held with weightings generally proportionate to the weightings in the Index. The bonds the Fund invests in will be composed primarily of securities issued by sovereign entities excluding the UK which are denominated in the currency of the issuer and which are inflation linked. Sub-investment grade bonds may be held. The Fund may also invest in other transferable securities, fixed interest securities, permitted deposits, money market instruments, cash, near cash and units in collective investment schemes.

The Fund will use forward foreign exchange or currency future derivatives in order to manage the currency exposure in line with the Index. This may mean that, at times, the Fund may use derivatives for investment purposes. The Fund may also hold other types of derivatives for efficient portfolio management purposes only.

Risk Profile

Credit Risk

This Fund is invested in financial securities such as bonds. With these investments, there is a risk of suffering loss due to a party not meeting its financial obligations. This risk is managed by monitoring the financial stability of investments and countries, via credit ratings.

Market Risk

Market risk arises mainly from uncertainty about future prices. It represents the potential loss the Fund may suffer through holding market positions in the face of market movements. The Manager adheres to the investment guidelines and in this way, monitors and controls the exposure to risk from any type of security, sector or issuer.

Currency Risk

This Fund is invested in overseas financial securities. The performance of the Fund may therefore be affected by changes in exchange rates. This risk may be managed by the use of forward currency contracts or currency futures, which aim to manage the effect of changing exchange rates.

Interest Rate Risk

This Fund is invested in interest bearing securities. The performance of the Fund may therefore be affected by changes in interest rates. The active monitoring and adjustment of the investments in the portfolio manages this risk.

Fund Facts

Period End Dates for Distributions:	5 Jun, 5 Dec	
Distribution Dates:	5 Aug, 5 Feb	
Ongoing Charges Figures:	5 Jun 17	5 Jun 16
F-Class	0.51%	0.51%
I-Class	0.27%	0.27%
C-Class	0.17%	0.17%
L-Class	0.07%	0.07%

The Ongoing Charges Figure (OCF) is the ratio of the Fund's total discloseable costs (excluding overdraft interest) to the average net assets of the Fund.

The OCF is intended to provide a reliable figure which gives the most accurate measure of what it costs to invest in a fund and is calculated based on the last period's figures.

Risk and Reward Profile

- This risk and reward profile is based on historical data which may not be a reliable indication of the Fund's risk and reward category in the future.
- The category is based on the rate at which the value of the Fund and the Index it is tracking have moved up and down in the past.
- This Fund is in category four because it invests in bonds issued by governments. These generally provide higher rewards and higher risks than investments in cash and lower rewards and lower risks than investments in company shares.
- The Fund's category is not guaranteed to remain the same and may change over time.
- Even a fund in the lowest category is not a risk free investment.

Distribution Information

F-Class

The distribution payable on 5 August 2017 is 0.4789p per unit for distribution units and 0.4858p per unit for accumulation units.

I-Class

The distribution payable on 5 August 2017 is 0.5427p per unit for distribution units and 0.5536p per unit for accumulation units.

C-Class

The distribution payable on 5 August 2017 is 0.5704p per unit for distribution units and 0.5820p per unit for accumulation units.

L-Class

The distribution payable on 5 August 2017 is 0.5972p per unit for distribution units.

Manager's Investment Report

During the year under review, the bid price of the Fund's F-Class accumulation units rose by 0.60%. Barclays, the Index compiler, calculates the benchmark Index at the end of the business day using closing prices, whereas the Fund is valued using prevailing prices at 3pm. Therefore, for tracking purposes the Fund has been revalued using closing prices, and adjusted for the effects of charges and taxation. On this basis, over the review year, the Fund rose by 1.12%, compared with the benchmark Index rise of 1.09% (Source: Bloomberg), producing a tracking difference of +0.03%.

Past performance is not a guide to future performance.

The value of investments and any income from them may go down as well as up.

Exchange rate changes may cause the value of any overseas investments to rise or fall.

Market/Economic Review

Global economic activity has improved markedly over the review year. The recovery has been particularly strong in the manufacturing sector, accompanied by an upturn in global trade volumes. A stabilisation and subsequent increase in commodity prices has been reflected in rising consumer price inflation in the major developed economies. While the recovery has been broad-based, it has been most noticeable in the US where growth accelerated during the second half of 2016 led by consumer demand. There has also been an upturn in investment spending and inventory levels, as Donald Trump's unexpected victory in the November presidential election focused investors on the prospect of increased infrastructure spending and tax cuts. The Federal Reserve has signalled a gradual tightening of monetary policy, raising interest rates in December 2016 and March 2017 and signalling two further rate hikes in 2017. However, monetary policy remained accommodating in all the major economies. After the UK unexpectedly voted to leave the European Union (EU) in the June 2016 referendum, the Bank of England cut interest rates to 0.25% and extended its asset purchase programme, known as quantitative easing (QE). Encouragingly, so far the UK economy has weathered the post-referendum volatility well. Both the European Central Bank and the Bank of Japan continued with the unorthodox policy of negative interest rates. In recent months, European economic indicators have highlighted an improvement in both manufacturing and service sector activity, while in Japan the economy expanded for four straight quarters in 2016. The Chinese authorities have adopted a range of policy initiatives to boost credit growth and domestic demand as the economy continued its transition from export and investment-driven growth towards consumption.

Over the review year, higher-rated government bonds such as US Treasuries, UK gilts and German bunds were initially underpinned by demand from risk-averse investors, as interest rates remained very low worldwide. However, since late 2016 longer-term interest rates in the major economies have moved higher, particularly in the

Manager's Investment Report continued

US where investors discounted looser fiscal policy. In the UK, the sharp post-referendum devaluation of Sterling raised expectations that inflation will accelerate over the coming year and consequently index-linked gilts easily outperformed their conventional counterparts. The Bank of England's decision to add high-quality corporate bonds to its QE programme in August provided a much-needed boost for Sterling-denominated bonds and sparked a wave of new issuance.

Fund Review

The US had 12 monthly auctions over the year under review, totalling \$135 billion of new issuance. New 10-year bonds were launched in July 2016 and January 2017 and both were subsequently re-opened another two times. There were three 30-year bond auctions with a new benchmark bond launched in February 2017. Similarly, the 5-year sector saw issuance three times with a new benchmark bond issued in April 2017. Three bonds, July 2017, January 2018 and April 2018 all left the Index after their remaining life to maturity fell below one year. For the remaining countries within the Index, six bonds left the Index; three from Japan and one each from France, Italy and Germany. Seven bonds joined the Index; one each from France, Japan, Italy, Sweden, Spain, New Zealand and Canada.

The Fund experienced strong net positive cash flow during the review year. The cash flows were used to adjust the Fund's holdings in such a way so as to ensure the Fund maintained an Index distribution at all times.

Outlook

Global growth remains above trend however, structural problems mean that rates are unlikely to fully normalise. The Fed raised rates by 0.25% in June and announced details around its plans for the orderly balance sheet reduction of its treasury and mortgage holdings, which could begin after another rate hike later this year. The prospect of President Trump being unable to deliver tax cuts has gained more ground, if delivered late cycle, the tax cuts could add to overheating pressure next year. Brexit negotiations have started and the success or otherwise of these will remain a major focus for the UK and Europe for some time; furthermore the political landscape is still uncertain despite the conclusive result for Macron in the French presidential election; markets will want to see a successful conclusion to the German federal elections in September.

Legal & General Investment Management Limited
(Investment Adviser)
27 June 2017

Manager's Report and Accounts

Copies of the most recent Interim and Annual Long Form Manager's Reports are available free of charge by telephoning 0370 050 0955, by writing to the Manager or are available on the internet at www.legalandgeneral.com/investments/fund-information/managers-reports.

Call charges will vary. We may record and monitor calls.

Information on Tracking Error

The 'Tracking Error' of a Fund is the measure of the volatility of the differences between the return of the Fund and the return of the benchmark Index. It provides an indication of how closely the Fund is tracking the performance of the benchmark Index after considering things such as Fund charges and taxation.

Using monthly returns, over the review year, the annualised Tracking Error of the Fund is 0.13%, whilst over the last three years to the end of May 2017, the annualised Tracking Error of the Fund is 0.05%. These Tracking Errors are within the anticipated Tracking Error levels set out in the Fund's Prospectus of +/-0.50% per annum.

EU Savings Directive

The Fund has been reviewed against the requirements of the Directive 2003/48/EC on Taxation of savings in the form of interest payments (ESD), following the HM Revenue & Customs debt investment reporting guidance notes.

Under the Directive, information is collected about the payment of distributions to residents in certain other countries and is reported to HM Revenue & Customs to be exchanged with Tax authorities in those countries.

The Fund falls within the 25% debt investment reporting threshold. This means that details of all distributions and redemption proceeds paid to non UK investors will be reported by Legal & General (Unit Trust Managers) Limited to HM Revenue & Customs to be exchanged with the relevant Tax authorities.

Dual Pricing Arrangement

The Manager's fixed dual pricing arrangement has a set spread to account for the costs of transacting in a particular Fund. Where the Manager operates a box through which unit subscriptions and unit redemptions are netted into a single trade instruction to the Trustee, the netting reduces the actual transaction costs and this generates a revenue to the Manager. The revenue generated from this activity is calculated on a monthly basis and returned to the Fund in the form of a payment from the Manager. This provides an enhanced return to the Fund, through the size of any return will be dependent on the size of subscriptions and redemptions.

Minimum Investment Amounts

The minimum initial lump sum investment amounts for each class are as follows:

F-Class	£500
I-Class	£1,000,000
C-Class	£100,000,000
L-Class	£100,000

In addition, monthly contributions can be made into the F-Class with a minimum amount of £50 per month.

L-Class is not available to retail customers and is intended only for investment by Legal & General group companies.

F-Class units are only available to:

- i) investors who have received advice from authorised intermediaries and platforms in relation to their investment in units in the Fund and
- ii) authorised intermediaries or distributors who the Manager reasonably considers will adequately bear the costs of marketing to and acquiring investors at no or limited cost to the Manager, and to whom the Manager has confirmed that such distributor or investor meets the criteria for investment in such units.

C-Class units are only available to distributors who actively market and distribute such units (or whom the manager believes intends to do so) and to whom the Manager has confirmed by letter that they meet the criteria for investment in such units.

Other Information

The information in this report is designed to enable unitholders to understand how the Fund has performed during the year under review and how it is invested at the year end. Further information on the activities and performance of the Fund can be obtained by telephoning 0370 050 0955 or by writing to the Manager.

Call charges will vary. We may record and monitor calls.

Significant Changes

Gross Distribution Payments

We'd like to make you aware of an HM Revenue & Customs ruling which became effective from 6 April 2017. Where interest distributions were previously paid net, we are required to start paying all interest distributions on a gross basis, starting with the June 2017 final distribution payment. Prior to 6 April 2017, interest distributions were paid to clients after the deduction of 20% income tax, unless the client has completed a gross declaration form. From 6 April 2017, we will not deduct tax on any interest distributions and all payments will be made gross.

It will become your responsibility to make any declarations to HM Revenue & Customs. If you are in any doubt as to your taxation position, please consult a professional adviser.
