FUND MANAGER COMMENTARY

Equity markets performed well through April as they recovered from March lows. Risk sentiment improved with increasing evidence that the curve of the infection rates for the coronavirus virus are progressively peaking. This is encouraging news though there remains a high degree of uncertainty as lockdowns begin to be relaxed globally.

For UK equity markets, we saw a broad continuation of good returns for defensives, structural winners and momentum. At the size level, Mid-caps found favour at the expense of Large caps. Corporate earnings season has been no worse than feared, though has less relevance given economic damage is likely to accelerate through Q2. Elsewhere, the oil price volatility has been extraordinary, with fears of a global glut driven by slumping demand and capacity constraints.

The L&G UK Special Situations fund delivered a return of 11.8% during the period. This was all driven by stock selection, where we saw positive contributions in Oil & Gas, Materials, Consumer Goods and Industrials. Sector allocation was negative, driven by the underweight in Healthcare which continues to perform well. At the company level, leading contributors were housebuilder Taylor Wimpey and mid-cap oil names Cairn Energy and Energiean. Go-Co and Biffa also enjoyed a good month. On the flipside, Grit Real Estate, Trian and Standard Chartered were the notable detractors. On activity, we introduced a new position in aerospace parts manufacturer Meggitt. On the flipside, the holding of Draper Esprit was sold.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
