 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to select investments to achieve the Fund's objective.
 - Your units will be income units. Income from the Fund's investments will be paid out to you every six months (as a dividend). This will reduce your capital growth accordingly.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 5 because the mix of different asset types in which the Fund invests has a balancing effect on the rate at which the Fund share price moves up and down. This type of fund is generally considered to be higher risk than one investing only in bonds and lower risk than one existing only in company shares.
 - Even a fund in the lowest category is not a risk free investment.
 - The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- By investing in other funds this Fund indirectly holds bonds and property that are traded through agents, brokers or investment banks or directly between buyers and sellers. This makes them less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell its holdings in other funds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depository.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

- **Dilution Adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'. This can vary but as an example for this Fund we estimate 0.19% for purchases and 0.19% for sales at 04 October 2021. The amount of the dilution adjustment may differ in future.
