

Legal & General Asian Income Trust

Unit Trust (UCITS compliant) R-Class GBP

Base currency: **GBP**

Domicile: **UK**

FUND AIM

The objective of the Fund is to provide income and growth above those of the FTSE Asia Pacific ex-Japan TR Net Index (the "Benchmark Index"). The Fund aims to outperform the Benchmark Index by 2% per annum. This objective is before the deduction of any charges and measured over rolling three year periods.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for a combination of Income and growth from an investment in company shares from the Asian Pacific and Australasian regions.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

FUND MANAGER COMMENTARY

Asia Pacific ex Japan equities returned +1.9% in GBP terms in August. Sino-US tensions remained elevated throughout the month, epitomised by President Trump’s proposed TikTok ban. Regionally, Macau, Hong Kong, Australia and China led the index’s performance, whilst Malaysia, Thailand and Taiwan underperformed. Macau gaming rebounded strongly as the Chinese government announced a full resumption of the Individual Visa Scheme (IVS) and group tour visas starting late September which is a catalyst for the sector. Sector wise, Consumer stocks led the region’s performance, along with Basic Materials, whereas Technology, Utilities and Telecoms dragged market performance down.

The fund returned +3.8% in GBP terms for August. From an allocation perspective, our underweight to Consumer hurt as did our c10% overweight to Telecoms. These were offset partially by the positive allocation effect from our underweight to Technology. Yet it was stock selection which was the reason behind our slight outperformance this month. We saw a strong recovery in some of our consumer cyclical names which have previously suffered: Hyundai Motor +25%, Qantas Airways +23%, and our Macau casino operators all +15-20%. Once again, not owning Alibaba detracted given the stock was +12% over the month.

August was not an active month in terms of portfolio trading.

PAUL HILLSLEY

Paul joined LGIM in 2006 and is the lead fund manager for the Asian income portfolios. He has managed the Asian Income Trust since its inception. He began his investment career in 1991 at Phillips and Drew Fund Management, now called UBS Global Asset Management, and developed broad experience across UK, Europe, Japan and, predominantly, Asia ex Japan, over subsequent years. At LGIM Paul launched the Asian Income Trust in November 2008 and in 2013 formed the Global Income Team which, together with Andrew Koch, Stephen Message and Camilla Ayling forms the core of the firm’s equity income expertise. He read engineering, economics and management at Lincoln College, Oxford University, and is an associate of the Society of Investment Professionals.

ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO₂) is the most significant contributor to greenhouse gas emissions which are driving climate change.

10,345
Tonnes

CO₂eⁱ per \$1 million of market capitalisation

CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figure is a measure of the size of carbon reserves held by the fund's underlying companies.

726
Tonnes

CO₂e per \$1 million of sales

CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

Carbon emissions intensity describes the relationship between the carbon emissions of a company and its salesⁱⁱ.

NOTES

ⁱ Carbon dioxide equivalent (CO₂e) is a standard unit to compare the emissions of different greenhouse gases.

ⁱⁱ The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.

For more information, please refer to the key investor information document on our website [↗](#)
