

L&G Healthcare Breakthrough UCITS ETF

ETF (UCITS compliant) USD Accumulating ETF Class

FUND AIM

The L&G Healthcare Breakthrough UCITS ETF (the "ETF") aims to track the performance of the ROBO Global® Healthcare Technology and Innovation Index TR (the "Index"). More information on the Index can be found on page 2 of this document.

RISK AND REWARD PROFILE

This ETF is rated 6 due to the nature of its investments and its risks.

The rating is calculated based on historical data and may not be a reliable indication of the ETF's future risk profile.

The risk category may shift over time.

The lowest category on the above scale does not mean "risk free."

WHO IS THIS FUND FOR?

- This ETF is designed for investors looking to grow their money in an investment which can form part of their existing savings portfolio
- Although investors can take their money out at any time, this ETF may not be appropriate for those who plan to withdraw their money within five years
- If you do not understand the information in this document, the key investor information document or the prospectus, we recommend that you seek additional information or advice to help you decide if this ETF is suitable for you.

Penumbra	1.6

INDEX DESCRIPTION

The Index aims to track the performance of a basket of companies that are actively engaged in the healthcare technology value-chain.

The index is comprised of companies which are publicly traded on various stock exchanges around the world that have a distinct portion of their business and revenue derived from the field of healthcare technologies, and the potential to grow within this space through innovation and/or market adoption of their products and/or services. Companies are included in the index receive a "HTEC Score" comprised of factors representing (1) the levels of revenue the company receives from innovative healthcare technologies, (2) the levels of investment the firm makes in healthcare technologies, (3) the market and technology leadership of the firm within the universe.

A company is only eligible for inclusion in the Index if it is of a sufficient size (determined by reference to the total market value of its shares) and it is sufficiently "liquid" (a measure of how actively its shares are traded on a daily basis). Within the Index, companies are weighted according a modified HTEC-factor weighting scheme. The Index is rebalanced quarterly in March, June, September and December.

INVESTMENT MANAGER

GO ETF Solutions LLP is the investment manager for each of the exchange traded funds (ETFs) issued by Legal & General UCITS ETF Plc and is responsible for the day-to-day investment management decisions for this ETF. The team is highly experienced with respect to all aspects relating to the management of an ETF portfolio, including collateral management, OTC swap trading, adherence to UCITS regulations and counterparty exposure and monitoring.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- Third party service providers (such as counterparties entering into financial derivative instruments with the ETF or the ETF's depository) may go bankrupt and fail to pay money due to the ETF or return property belonging to the ETF.
- As the Index includes micro, small and medium-sized publicly traded companies, the ETF is subject to the risk that such companies may be more vulnerable to adverse business or economic events and greater and more unpredictable price changes than larger companies or the stock market as a whole.
- The ETF is subject to the risks associated with technology-focused companies and are particularly vulnerable to rapid developments in technology (which may leave their products out-of-date), government regulation and competition from domestic and foreign competitors who may have lower production costs. Such companies may also have difficulties establishing and maintaining patents, copyrights, trademarks and trade secrets relating to their products which could negatively affect their value.
- It may not always be possible to buy and sell ETF shares on a stock exchange or at prices closely reflecting the NAV.
- If the Index provider stops calculating the Index or if the ETF's license to track the Index is terminated, the ETF may have to be closed.
