

L&G Future World Global Equity Focus Fund

SICAV (UCITS compliant) Z-Class USD Acc

Base currency: USD

Domicile: Luxembourg

FUND AIM

The objective of the Fund is to generate long term capital growth above that of the MSCI World Total Return Net Index, the "Benchmark Index". The Fund is actively managed and aims to outperform the Benchmark Index by 3% per annum. This objective is before the deduction of any charges and measured over rolling three year periods. There can be no assurance that the Fund will achieve its investment objective.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for growth from an investment in global equities.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

FUTURE WORLD PHILOSOPHY

- The FutureWorld philosophy encapsulates how we identify long-term themes and opportunities, while managing the risks of a changing world
- We use our scale and influence within the market to propel positive change on environmental, social and governance (ESG) issues, at the same time as seeking to achieve financial success
- The FutureWorld funds are for clients who want to express a conviction on ESG themes, across a broad array of asset classes and strategies

FUND CHARACTERISTICS

- Takes a high-conviction approach that offers global exposure to companies benefiting from long-term structural changes, while integrating environmental, social and corporate governance factors
- Incorporates LGIM's Climate Impact Pledge, an engagement process with companies we deem critical to meeting the aims of the Paris Agreement to limit climate change
- Does not hold 'pure' coal miners, manufacturers of controversial weapons and perennial offenders of the UN Global Compact

DOES IT HAVE A SUSTAINABLE OBJECTIVE?

- The Fund has a sustainable investment objective as it invests in companies which (i) contribute to environmental or social objectives, (ii) do not significantly harm any environmental or social objectives, and (iii) follow good governance practices. Further information can be found in the Supplement. The Fund is multi-thematic and targets sustainable themes. All investments held by the Fund contribute to one or more of the UN Sustainable Development Goals (SDGs). The Fund is also committed to maintaining at least 50% less carbon emissions than the MSCI World Index.

Fund	14.53	21.76	29.31	-	-
Benchmark	21.82	15.90	27.67	-	-

All performance periods over a year will be annualised. Performance for the Z USD Acc share class in USD, launched on 13 July 2018. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund. This fund has adopted a "swing pricing" methodology, such that the Net Asset Value per Share of the fund may be adjusted upwards or downwards to reflect the costs of dealing in the fund's assets. As the swinging price only affects shareholders which place subscription or redemption instructions, we have used the notional unswung mid-price history in the tables and charts above in order to remove the volatile effect that the swing pricing has on the depiction of past performance of the Fund. Please refer to the Key Investor Information Document for a past performance depiction based on the dealing price.

Past performance is not a guide to the future.

Fund returns shown are based on prices as at the last fund trading day for the month. Due to bank holidays this may impact relative performance to any benchmarks which are priced on a bank holiday which falls within a month but after the last fund trading day for that month.

NITIN ANANDKAR

Nitin joined LGIM in 2021 and has been a global equities investor for more than two decades. He was previously at USS Investment Management since 2018, initially as part of the US Equities team and since 2020 as part of the Global Emerging Markets team. Prior to USS, Nitin spent eight years as a Global Equities Portfolio Manager at Seven Pillars Capital Management. Nitin started his buy-side career at MFS Investment Management covering various European/Global sectors as an analyst. Previously Nitin was a sell-side analyst and Head of Research at Jardine Fleming (now JP Morgan) in India. Nitin has a Masters in Finance degree from London Business School and a Management Studies degree from Mumbai University.

ESG COMMITMENT

From diesel emissions to oil spills, there have been many tangible examples in recent years of how failures in the way companies are run can have a harmful impact on the environment, society and investor returns. We believe responsible investing can mitigate the risk of such outcomes and has the potential to improve returns through the integration of environmental, social and governance (ESG) considerations, active ownership and long-term thematic analysis.

ESG score of fund

ESG score of index

ESG SCORE

We score companies based on environmental, social and governance factors. The ESG Score is aligned to our engagement and voting activities. As a result, this portfolio has an aggregate ESG Score of **63** versus a mainstream index of **56**.

This portfolio is constructed through bottom-up fundamental analysis where ESG is fully integrated into stock selection. This qualitative approach contrasts with a systematic approach and is designed to be forward looking, investing in companies with materially improving ESG characteristics. For more details see Notes.

ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO₂) is the most significant contributor to greenhouse gas emissions which are driving climate change. Compared to a fund tracking the unadjusted benchmark, the fund will have a different exposure to current and future sources of carbon dioxide emissions.

↓ **100%** Lower carbon reserves intensity than the unadjusted benchmark

CARBON RESERVES INTENSITY

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figures below are a measure of the size of carbon reserves held by the fund's underlying companies.

0 Fund	1,239 Benchmark	Tonnes of CO₂eⁱ per \$1 million of enterprise value including cash (EVIC)
------------------	---------------------------	--

The fund has **100%** lower carbon reserves intensityⁱⁱ compared to a fund tracking the unadjusted benchmark.

The difference in carbon reserves intensity means that for every \$1 million invested in the fund, the exposure to carbon reserves through the underlying companies is reduced by an amount equivalent to **1239 tonnes of CO₂e** compared to having invested in the unadjusted benchmark.

↓ **84%** Lower carbon footprint than the unadjusted benchmark

CARBON FOOTPRINT

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

9 Fund	55 Benchmark	Tonnes of CO₂e per \$1 million of EVIC
------------------	------------------------	--

The fund has **84%** lower carbon footprint compared to a fund tracking the unadjusted benchmark. Carbon footprint describes the relationship between the carbon emissions of a company and its EVICⁱⁱⁱ.

The difference in carbon footprint means that the fund has selected companies where, for the same level of EVIC, the associated emissions^{iv} are lower by **46 tonnes of CO₂e** compared to a fund tracking the unadjusted benchmark^v.

For further information please go to www.lgim.com/esginfo

The proxy benchmark for this fund is Solactive GBS Developed Markets Large & Mid Cap USD Index.

NOTES

ⁱ Carbon dioxide equivalent (CO₂e) is a standard unit to compare the emissions of different greenhouse gases.

ⁱⁱ This metric looks at the embedded carbon in the fossil fuel reserves owned by a company, divided by a company's enterprise value (including cash), to adjust for company size. This represents a carbon reserves intensity score for a company.

ⁱⁱⁱ The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

^{iv} Data on carbon emissions from a company's operations and purchased energy is used.

^v This measure is the result of differences in the weights of companies between the index or the fund and the benchmark, and does not depend on the amount invested in the fund. It describes the relative 'carbon efficiency' of different companies in the benchmark (i.e. how much carbon was emitted per unit of sales) or in the fund, not the contribution of an individual investor in financing carbon emissions.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The Fund's risk rating is 6, because it invests in company shares, which generally provide higher rewards and higher risks than other investments, such as bonds, cash or commercial property.

KEY RISKS

- The value of an investment is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- This fund invests in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: may not be as well regulated; may be more difficult to buy and sell; may have less reliable arrangements for the safekeeping of investments; or may be more exposed to political and taxation uncertainties. The value of the fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short term.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the fund can be greater where derivatives are used in an extensive or complex way.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
