

L&G Future World Global Equity Focus Fund

SICAV (UCITS compliant) Z-Class USD Acc

Base currency: USD

Domicile: Luxembourg

FUND AIM

The objective of the Fund is to generate long term capital growth above that of the MSCI World Total Return Net Index, the "Benchmark Index". The Fund is actively managed and aims to outperform the Benchmark Index by 3% per annum. This objective is before the deduction of any charges and measured over rolling three year periods. There can be no assurance that the Fund will achieve its investment objective.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for growth from an investment in global equities.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

FUTURE WORLD PHILOSOPHY

- The Future World philosophy encapsulates how we identify long-term themes and opportunities, while managing the risks of a changing world
- We use our scale and influence within the market to propel positive change on environmental, social and governance (ESG) issues, at the same time as seeking to achieve financial success
- The Future World funds are for clients who want to express a conviction on ESG themes, across a broad array of asset classes and strategies

Fund	4.85	-	-	-	-
Benchmark	2.84	-	-	-	-

All performance periods over a year will be annualised. For annual performance against the performance objective please see the Key Investor Information Document (KIID). Performance for the Z USD Acc share class in USD, launched on 13 July 2018. Source: Lipper. Performance is calculated on a Net Asset Value (NAV) to NAV basis and assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund. This fund has adopted a single swinging price, this means that on any given day the single dealing price will be set at either bid, offer or somewhere in between, based on whether there was a net inflow or outflow into or out of the Fund. Swing pricing, as defined in the Prospectus, may be applied on a subscription or redemption of shares to reflect the costs of dealing in the Fund's assets.

Past performance is not a guide to the future.

FUND CHARACTERISTICS

- Takes a high-conviction approach that offers global exposure to companies benefiting from long-term structural changes, while integrating environmental, social and corporate governance factors
- Incorporates LGIM's Climate Impact Pledge, an engagement process with companies we deem critical to meeting the aims of the Paris Agreement to limit climate change
- Does not hold 'pure' coal miners, manufacturers of controversial weapons and perennial offenders of the UN Global Compact

SHAUNAK MAZUMDER

Shaunak joined LGIM in 2014 from Asian Century Quest, a multi-billion dollar fundamental focused long/short equity hedge fund based in New York. Shaunak has a BComm from Queen's University Kingston, Canada.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time.

KEY RISKS

- The value of an investment is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- This fund invests in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: may not be as well regulated; may be more difficult to buy and sell; may have less reliable arrangements for the safekeeping of investments; or may be more exposed to political and taxation uncertainties. The value of the fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short term.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the fund can be greater where derivatives are used in an extensive or complex way.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
