

Legal & General Real Capital Builder Fund

Unit Trust (UCITS compliant) I-Class GBP

FUND AIM

The fund's objective is to grow capital, at the rate of inflation (CPI (UK Consumer Prices Index)) +4% per annum on average over a rolling five year period and to manage volatility so that it remains around two thirds of the MSCI World Index. This objective is before the deduction of any charges and assumes any income is reinvested.

There is no guarantee that the objective will be met over any time period and capital is at risk.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 4 because historically the mix of investments it could hold have shown a medium level of volatility (how much the fund price goes up and down compared to the other risk categories).

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking to build up their savings in an investment that can make up a substantial part of their savings portfolio.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up. You may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- This fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depository.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
