RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This risk and reward indicator is based on historical data which may not be a reliable indication of the Fund's risk and reward category in the future.
- The category number highlighted above reflects the rate at which the Fund's unit price has moved up and down in the past. If the Fund has less than 5 years' track record, the number also reflects the rate at which a representative benchmark has moved up and down in the past. Higher numbers mean the potential reward could be greater, but this comes with increased risk of losing money.
- The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- The Fund's category is not guaranteed to remain the same and may change over time.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund may have underlying investments that are valued in currencies that are different from sterling (British Pounds). Any such investments will be impacted by exchange rate fluctuations and this may affect the value of your investment and any income from it. Currency hedging techniques may be applied to reduce the impact of exchange rate fluctuations but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the Fund's capital rather than the Fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

Other costs:

- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'. The spread is separate to the ongoing charges shown in this section. This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.46% higher than the selling price at 31 December 2017.
