

AAA-AA Fixed Interest Over 15 Year Targeted Duration Fund (charges included)

Unit-Linked Life Insurance Reported in GBP

FUND AIM

The fund aims to produce a total return in line with the performance of a subset of the FTSE Actuaries UK Conventional Gilts Over 15 Years Index, this being the gilts with maturities of 15 to 35 years and capture the yield spread over gilts of AAA-AA rated fixed interest securities.

RISK AND REWARD PROFILE

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- The members of UK registered and certain non-UK registered defined benefit or defined contribution occupational pension schemes.
- Although investors can take their money out at any time, the recommended minimum holding period is 5 years.

FUND FACTS

Fund size £7.8m	Base currency GBP	Benchmark -	
Launch date Jun 2001	Domicile United Kingdom	Gross redemption yield 1.74% (unhedged)	Modified duration 17.44 years

PERFORMANCE (%)

	YTD	3m	6m	1y	3y	5y
■ Fund	11.73	-5.18	3.40	11.73	4.92	6.06

ANNUAL PERFORMANCE (%)

12 months to 31 December	2019	2018	2017	2016	2015
Fund	11.73	-0.97	4.37	16.83	-0.54

All performance periods over a year will be annualised. Source: LGIM. Performance based on daily close mid-market prices after the deduction of our standard investment management fees, which may or may not be the same for your scheme. Please refer to your scheme literature, or to your scheme administrator, for the fee rate that applies to your scheme. **Past performance is not a guide to the future.**

FUND CHARACTERISTICS

This passively managed fund follows a buy and maintain strategy and provides an alternative to the Over 15 Year Gilt Index Fund through exposure to AAA-AA corporate bonds that are, following issue, constituents of the Markit iBoxx £ Non-Gilts Sovereign & Sub-Sovereign AAA-AA Over 15 Years Index. The fund may also hold gilts to provide liquidity and to ensure that the fund's duration remains within tolerance of the FTSE Actuaries UK Conventional Gilts 15-35 Years Index.

Please note that with effect from 1 February 2014 the objective and investable universe of the fund changed and the fund name changed from the AAA Fixed Interest Over 15 Year Fund.

PORTFOLIO BREAKDOWN

All data source LGIM unless otherwise stated. Totals may not sum due to rounding. In order to minimise transaction costs, the Fund will not always own all the assets that constitute the index and on occasion it will own assets that are not in the index.

INDEX FUND MANAGEMENT TEAM

The Index Fund Management team comprises 25 fund managers, supported by two analysts. Management oversight is provided by the Global Head of Index Funds. The team has average industry experience of 15 years, of which seven years has been at LGIM, and is focused on achieving the equally important objectives of close tracking and maximising returns.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from your investment is not guaranteed and therefore you may receive a lower or higher return than you anticipated. There will be a variation in performance between funds with similar objectives due to the different assets selected.
- PMC's charges and associated transaction costs are subject to change, with notice for the former and without notice for the latter. Charges and transactions costs deducted from the policy reduce your potential for capital growth in the future.
- Tax rules and the treatment of income and capital gains could change in the future and may be applied retrospectively.
- Inflation reduces the purchasing power of money over time as the cost of purchasing goods and services increases. If the rate of inflation exceeds the rate of return on your portfolio, it will erode the value of your portfolio and its investments in real terms.
- In extreme market conditions it may be difficult to realise assets held for a fund and it may not be possible to redeem units at short notice. We may have to delay acting on your instructions to sell or the price at which you cancel the units may be lower than you anticipated.
- The value of a fund's assets may be affected by uncertainties such as international political developments, market sentiment, economic conditions, changes in government policies, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investment may be made.
- PMC seeks to mitigate counterparty risk wherever possible on behalf of its policyholders through a variety of measures which include: each fund's non-cash assets being held with independent custodians, sweeping cash (where appropriate) overnight into the LGIM's range of Liquidity funds (above a deminimus level), using the delivery versus payment system when settling transactions and the use of central clearing for exchange traded derivatives and forward foreign exchange transactions. However, in the event of the failure of a counterparty, custodian or issuer there is a residual risk that a fund may suffer asset losses which are unrecoverable.
