Lanxess	1.8

INDEX DESCRIPTION

The Index aims to track the performance of a basket of stocks of companies that are actively engaged in the international clean water industry through the provision of technological, digital, engineering, utility and/or other services.

The Index is comprised of companies which are publically traded on various stock exchanges around the world that are either i) companies determined to have expertise in "Utilities" with a minimum Water Revenue Share of 90%, or ii) companies determined to have expertise in "Engineering" with a minimum Water Revenue Share of 50% or iii) companies determined to have expertise in "Technology" or "Digital" and a minimum Water Revenue Share of 5%. A company is only eligible for inclusion in the index if (1) it is of sufficient size (determined by reference to the total market value of the proportion of its shares that are publically traded) and (2) it is sufficiently "liquid" (a measure of how actively its shares are traded on a daily basis). Moreover, the Index excludes companies: (a) engaged in pure coal mining; (b) involved in the production of controversial weapons; or (c) that, for a continuous period of three years, have been classified as being in breach of at least one of the UN Global Compact principles, which is a set of globally accepted standards on human rights, labour, environment and corruption.

The universe of companies out of which the Index selection is made is refreshed annually in March. However, the Index is reconstituted semi-annually in March and September in accordance with the full selection criteria and all companies are equally weighted within the Index. On a monthly basis, the weight of each company is assessed and, if any of them exceed 15% of the index, the weights of all companies are adjusted so that they are again equally weighted within the Index.

INVESTMENT MANAGER

GO ETF Solutions LLP is the investment manager for each of the exchange traded funds (ETFs) issued by Legal & General UCITS ETF Plc and is responsible for the day-to-day investment management decisions for this ETF. The team is highly experienced with respect to all aspects relating to the management of an ETF portfolio, including collateral management, OTC swap trading, adherence to UCITS regulations and counterparty exposure and monitoring.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- Third party service providers (such as counterparties entering into financial derivative instruments with the ETF or the ETF's depository) may go bankrupt and fail to pay money due to the ETF or return property belonging to the ETF.
- As the Index includes micro, small and medium-sized publicly traded companies, the ETF is subject to the risk that such companies may be more vulnerable to adverse business or economic events and greater and more unpredictable price changes than larger companies or the stock market as a whole.
- The ETF is subject to the risks associated with technology-focused companies and are particularly vulnerable to rapid developments in technology (which may leave their products out-of-date), government regulation and competition from domestic and foreign competitors who may have lower production costs. Such companies may also have difficulties establishing and maintaining patents, copyrights, trademarks and trade secrets relating to their products which could negatively affect their value.
- It may not always be possible to buy and sell ETF shares on a stock exchange or at prices closely reflecting the NAV.
- If the Index provider stops calculating the Index or if the ETF's license to track the Index is terminated, the ETF may have to be closed.
