

Legal & General UK Select Equity Fund

Unit Trust (UK UCITS compliant) I-Class GBP

Base currency: **GBP**

Domicile: **UK**

FUND AIM

The objective of this Fund is to provide growth above that of the FTSE All Share TR Net Index, the "Benchmark Index". The Fund aims to outperform the Benchmark Index by 3% per annum before charges, over rolling three year periods.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

This fund is in category 6 because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds, cash or commercial property.

For more information, please refer to the Key Risks section on page 4.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for growth from an investment in UK shares.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

FUND SNAPSHOT

- **What does it invest in?** Invests at least 90% in shares of UK companies. The proportion of the fund invested in a company can vary between -10% and +5% of the weighting of that company in the Index.
- **How does it invest?** Actively managed, with holdings in between 30 and 60 companies on average over a typical market cycle of 3-5 years, which means the fund may be concentrated at times.

For annual performance against the performance objective please see the Key Investor Information Document (KIID). Performance for the I Inc unit class in GBP, launched on 31 October 2012. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund.

Past performance is not a guide to the future.

FUND MANAGER COMMENTARY

It was not as plain sailing as other Summer months, but we ended August with a seventh straight monthly advance for global indices which recorded fresh highs. Improving bottom-up corporate news flow and ample liquidity did its best to offset a growing wall of worry spanning the Delta variant and supply chain woes to peak earnings and slowing macro momentum. M&A enthusiasm continued amongst UK midcaps while the IPO pipeline looks set to pick up again as we enter the Autumn months.

Turning to performance, leadership of equity markets is broadly inconsistent by style. 'Normalisation' optimism means bouts of outperformance for cyclical and more economically sensitive industries. In the UK, we saw Industrials, Technology, Real Estate Utilities and Healthcare sectors perform well in the period while Resources, Energy and Consumer focussed industries lagged.

We were pleased to see L&G UK Select Equity outperform its benchmark by 70bps during a strong month. Sector allocation made a positive contribution, led by our underweight to Resources and overweight in Real Estate. For selection the gains in Industrials were offset by weakness in our off-benchmark Technology names. At the stock level, we saw Ceres Power, RWS Holdings, Trustpilot, Network Intl, Tritax, Ocado Group and Marshalls all outperform. Turning to negatives, the largest detractors were Alphawave and Darktrace. On trading activity we introduced a new position in Weir Group and sold Rio Tinto as we switched our mining exposure to the more favourable positioning of the mining equipment sub-sector.

GAVIN LAUNDER

Gavin joined LGIM in 2007 and has been the Fund Manager for the UK Select Equity Fund since June 2018. Previously, he was a Global Equities Analyst at BlueBay Asset Management. Gavin spent the majority of his buy-side career as a Portfolio Manager with UBS O'Connor. Prior to this, he was a top-rated, sell-side analyst covering the Autos, Capital Goods and Conglomerates sectors at investment banks including SG Warburg (now part of UBS) and Goldman Sachs. Gavin holds a degree in Philosophy and Economics from University College, London.

ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO₂) is the most significant contributor to greenhouse gas emissions which are driving climate change.

CO₂eⁱ per \$1 million EVIC

CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figure is a measure of the size of carbon reserves held by the fund's underlying companies.

CO₂e per \$1 million of revenues

CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

Carbon emissions intensity describes the relationship between the carbon emissions of a company and its salesⁱⁱ.

NOTES

ⁱ Carbon dioxide equivalent (CO₂e) is a standard unit to compare the emissions of different greenhouse gases.

ⁱⁱ The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

For more information, please refer to the key investor information document on our website [↗](#)

LATEST DISTRIBUTION INFORMATION

For distributing unit classes, the latest payments are shown below. Please note that these payments are not guaranteed, are at the discretion of the manager and may be paid out of capital.
