

Legal & General UK Special Situations Trust

Unit Trust (UK UCITS compliant) I-Class GBP

Base currency: **GBP**

Domicile: **UK**

FUND AIM

The objective of the Fund is to provide growth above that of the FTSE All Share TR Net Index, the "Benchmark Index". The Fund aims to outperform the Benchmark Index by 5% per annum. This objective is before the deduction of any charges and measured over rolling three year periods.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

This fund is in category 6 because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds, cash or commercial property.

For more information, please refer to the Key Risks section on page 4.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for a more specialist investment providing growth from an investment in shares of UK companies which are considered undervalued due to their special situation.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

For annual performance against the performance objective please see the Key Investor Information Document (KIID). Performance for the I Inc unit class in GBP, launched on 10 November 2008. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund.

Past performance is not a guide to the future.

FUND SNAPSHOT

- **What does it invest in?** Invests at least 80% in shares of UK companies which are considered to be undervalued by the market, where the Manager believes there to be a catalyst (a feature or market event) which should increase the value of the company.
- **How does it invest?** Actively managed, with holdings in between 30 and 60 companies on average over a typical market cycle of 3-5 years, which means the fund may be concentrated at times.

FUND MANAGER COMMENTARY

The UK equity market experienced weakness in January, in contrast to the very strong end months of 2020. Technical distortions made for a volatile month in developed markets, on the back of retail investor exuberance and a Long/Short squeeze. The sharp surge in trading volumes in the final week of the period drove the VIX Index from 22 to 37. Nevertheless, fundamentals remain okay, with optimism on US stimulus and solid Chinese data, while the gradual uptick in the pace of vaccinations is a positive. Deal flow and IPO activity momentum made for a busy month and earnings season has been robust and broadly ahead of expectations thus far, especially in UK retail. Equities do still however need to work through the third virus wave and resulting lockdowns.

The L&G UK Special Situations Trust underperformed against its benchmark in January. Sector allocation was broadly neutral overall, with weakness from the underweight positioning in Basic Materials being offset by the positive contribution from being underweight in Consumer Goods. Stock selection therefore accounted for the underperformance. At the individual stock level, the top performers included Energean, RWS Holdings and Ashtead. Underperforming names included Taylor Wimpey, Prudential and Cairn Energy.

In terms of new activity, we sold our position in Blue Prism. The business experienced significant deceleration in organic growth as well capitalised private peers aggressively chased new business at the expense of returns.

ROBERT WHITE

Robert joined LGIM in 2018 as a Fund Manager for the UK Special Situations Trust. Prior to this Robert worked at Mirabaud Asset Management where he was an Assistant Fund Manager (2013 to 2018) on the UK Equities Core product. Before that he worked at PWC in their Transaction Services division. In total he has over 10 years experience working within financial services. He read Philosophy, Politics and Economics at Pembroke College, Oxford and is a member of the Institute of Chartered Accountants in England and Wales.

ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO₂) is the most significant contributor to greenhouse gas emissions which are driving climate change.

1,949
Tonnes

CO₂eⁱ per \$1 million of market capitalisation

CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figure is a measure of the size of carbon reserves held by the fund's underlying companies.

98
Tonnes

CO₂e per \$1 million of sales

CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

Carbon emissions intensity describes the relationship between the carbon emissions of a company and its salesⁱⁱ.

NOTES

ⁱ Carbon dioxide equivalent (CO₂e) is a standard unit to compare the emissions of different greenhouse gases.

ⁱⁱ The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

For more information, please refer to the key investor information document on our website [↗](#)

LATEST DISTRIBUTION INFORMATION

For distributing unit classes, the latest payments are shown below. Please note that these payments are not guaranteed, are at the discretion of the manager and may be paid out of capital.
