L&G 15 Year+ Germany, France and Netherlands Government Bond Index Fund

Share Class I EUR Accumulation - ISIN: IE00BJ7W3C43

The Fund is a sub-fund of Legal & General ICAV. Manager: LGIM Managers (Europe) Limited, part of the Legal & General group

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide a combination of growth and income by tracking the performance of the FTSE EMU Government Bond Germany, France and Netherlands Over 15 Year Index (the "Index").
 - The Fund primarily invests directly in fixed rate bonds that are constituents of the Index and which are issued by the German, French and Dutch governments. The Index consists of Euro denominated sovereign investment grade (minimum rating required of Baa3 and BBB- by Moody's and S&P respectively, see the FTSE website for further details should rating be unavailable) debt instruments (i.e. bonds) that have a minimum maturity remaining of over 15 years in accordance with the index provider's methodology.
 - The Fund will aim to replicate the Index by using index 'sampling' techniques to select securities and will ensure the Fund has similar characteristics as the Index whilst not necessarily holding all of the constituents of the Index. While the Fund is expected to track the Index as closely as possible, it typically will not match the performance of the targeted Index exactly.
 - The bonds that the Fund may invest in will be a mixture of sub-investment grade, investment grade and non-rated bonds. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time. Sub-investment grade bonds are rated as higher risk and investment grade bonds are rated as lower risk. Non-rated bonds have not been rated by a rating agency.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk; or
 - manage the effect of currency exchange rates.
 - The Fund may also engage in stock lending. This is when it lends its investments to third parties as a means of generating additional income and to off-set the costs of the Fund. The Fund's Prospectus gives more information about stock lending.
- Other information:**
- The Fund is considered to be passively managed as it aims to replicate the Index by using index 'sampling' techniques.
 - Your shares will be accumulation shares. Income from the Fund's investments will be reinvested back into the value of your shares.
 - This Fund is designed for investors looking for growth and income from an investment in bonds issued by German, French and Dutch governments.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.
 - You can buy or sell shares on any normal business day. If we receive your instruction before 2pm (Irish time), shares will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in euro (EUR).
 - The Index is a Total Return Index.

RISK AND REWARD PROFILE

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 5 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a Fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this Fund is contained in the Prospectus available at www.lgim.com.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

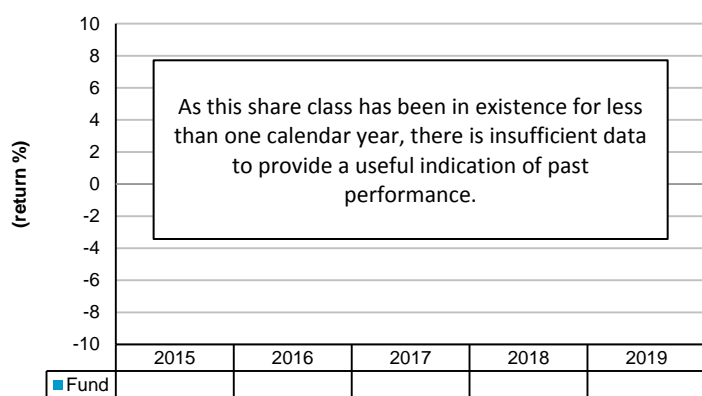

One-off charges taken before or after you invest	
Entry charge	None*
Exit charge	None*
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
*The Fund also incurs an anti-dilution levy. See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.20 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
- The ongoing charges figure is based on estimates at launch. The Fund's annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- Some or all of the ongoing charges may be taken from the capital of the Fund.

Other Costs:

- **Anti-dilution levy:** each day the Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, if necessary to protect ongoing investors, we can also take a deduction from anyone buying, selling or switching shares. This deduction is called the 'anti-dilution levy' and reflects the difference between the buying and selling prices of the assets in the Fund and costs associated with buying and selling the assets.
- The anti-dilution levy is separate to the ongoing charges shown in this section.
- As an example, the anti-dilution levy for this Fund was 0.0730% for purchases and 0.0730% for sales at launch. Please note this figure is an estimate as the fund is new. The amount of the anti-dilution levy may differ in future.
- **For more information about charges and the anti-dilution levy, please see sections headed "Fees, Charges and Expenses" of the Fund's Prospectus, which can be obtained on our website www.lgim.com.**
