

# L&G Future World Global Equity Focus Fund

SICAV (UCITS compliant) Z-Class USD Acc

Base currency: USD

Domicile: Luxembourg

## FUND AIM

The objective of the Fund is to generate long term capital growth above that of the MSCI World Total Return Net Index, the "Benchmark Index". The Fund is actively managed and aims to outperform the Benchmark Index by 3% per annum. This objective is before the deduction of any charges and measured over rolling three year periods. There can be no assurance that the Fund will achieve its investment objective.

## WHO IS THIS FUND FOR?

- This fund is designed for investors looking for growth from an investment in global equities.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

## FUTURE WORLD PHILOSOPHY

- The FutureWorld philosophy encapsulates how we identify long-term themes and opportunities, while managing the risks of a changing world
- We use our scale and influence within the market to propel positive change on environmental, social and governance (ESG) issues, at the same time as seeking to achieve financial success
- The FutureWorld funds are for clients who want to express a conviction on ESG themes, across a broad array of asset classes and strategies

## FUND CHARACTERISTICS

- Takes a high-conviction approach that offers global exposure to companies benefiting from long-term structural changes, while integrating environmental, social and corporate governance factors
- Incorporates LGIM's Climate Impact Pledge, an engagement process with companies we deem critical to meeting the aims of the Paris Agreement to limit climate change
- Does not hold 'pure' coal miners, manufacturers of controversial weapons and perennial offenders of the UN Global Compact

## DOES IT HAVE A SUSTAINABLE OBJECTIVE?

- The Fund has a sustainable investment objective as it invests in companies which (i) contribute to environmental or social objectives, (ii) do not significantly harm any environmental or social objectives, and (iii) follow good governance practices. Further information can be found in the Supplement. The Fund is multi-thematic and targets sustainable themes. All investments held by the Fund contribute to one or more of the UN Sustainable Development Goals (SDGs). The Fund is also committed to maintaining at least 50% less carbon emissions than the MSCI World Index.

12 months to 30 June	2021	2020	2019	2018	2017
Fund	38.36	4.85	-	-	-
Benchmark	39.04	2.84	-	-	-

All performance periods over a year will be annualised. Performance for the Z USD Acc share class in USD, launched on 13 July 2018. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund. This fund has adopted a "swing pricing" methodology, such that the Net Asset Value per Share of the fund may be adjusted upwards or downwards to reflect the costs of dealing in the fund's assets. As the swinging price only affects shareholders which place subscription or redemption instructions, we have used the notional unswung mid-price history in the tables and charts above in order to remove the volatile effect that the swing pricing has on the depiction of past performance of the Fund. Please refer to the Key Investor Information Document for a past performance depiction based on the dealing price.

**Past performance is not a guide to the future.**

### SHAUNAK MAZUMDER

Shaunak joined LGIM in 2014 from Asian Century Quest, a multi-billion dollar fundamental focused long/short equity hedge fund based in New York. Shaunak has a BComm from Queen's University Kingston, Canada.

## ESG COMMITMENT

From diesel emissions to oil spills, there have been many tangible examples in recent years of how failures in the way companies are run can have a harmful impact on the environment, society and investor returns. We believe responsible investing can mitigate the risk of such outcomes and has the potential to improve returns through the integration of environmental, social and governance (ESG) considerations, active ownership and long-term thematic analysis.

ESG score of fund

ESG score of index

### ESG SCORE

We score companies based on environmental, social and governance factors. The ESG Score is aligned to our engagement and voting activities. As a result, this portfolio has an aggregate ESG Score of **62** versus a mainstream index of **55**.

This portfolio is constructed through bottom-up fundamental analysis where ESG is fully integrated into stock selection. This qualitative approach contrasts with a systematic approach and is designed to be forward looking, investing in companies with materially improving ESG characteristics. For more details see Notes.

## ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO<sub>2</sub>) is the most significant contributor to greenhouse gas emissions which are driving climate change. Compared to a fund tracking the unadjusted benchmark, the fund will have a different exposure to current and future sources of carbon dioxide emissions.

**↓ 100%** Lower carbon reserves intensity than the unadjusted benchmark

### CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figures below are a measure of the size of carbon reserves held by the fund's underlying companies.

**0** Fund **1,016** Benchmark **Tonnes of CO<sub>2</sub>e<sup>1</sup> per \$1 million EVIC**

The fund has **100%** lower carbon reserves intensity<sup>ii</sup> compared to a fund tracking the unadjusted benchmark.

The difference in carbon reserves intensity means that for every \$1 million invested in the fund, the exposure to carbon reserves through the underlying companies is reduced by an amount equivalent to **1016 tonnes of CO<sub>2</sub>e** compared to having invested in the unadjusted benchmark.

**↓ 93%** Lower carbon emissions intensity than the unadjusted benchmark

### CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

**4** Fund **54** Benchmark **Tonnes of CO<sub>2</sub>e per \$1 million of revenues**

The fund has **93%** lower carbon emissions intensity compared to a fund tracking the unadjusted benchmark. Carbon emissions intensity describes the relationship between the carbon emissions of a company and its sales<sup>iii</sup>.

The difference in carbon emissions intensity means that for every \$1 million invested in the fund, the exposure to carbon emissions through the underlying companies is reduced by an amount equivalent to **50 tonnes of CO<sub>2</sub>e** compared to a fund tracking the unadjusted benchmark.

For further information please go to [www.lgim.com/esginfo](http://www.lgim.com/esginfo)

**The proxy benchmark for this fund is Solactive GBS Developed Markets Large & Mid Cap USD Index.**

---

**NOTES**

- i. Carbon dioxide equivalent (CO<sub>2</sub> e) is a standard unit to compare the emissions of different greenhouse gases.
- ii. The carbon reserves intensity of a company captures the relationship between the carbon reserves the company owns and its market capitalisation. The carbon reserves intensity of the overall fund reflects the relative weights of the different companies in the fund.
- iii. Data on carbon emissions from a company's operations and purchased energy is used.

## RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time.

## KEY RISKS

- The value of an investment is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- This fund invests in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: may not be as well regulated; may be more difficult to buy and sell; may have less reliable arrangements for the safekeeping of investments; or may be more exposed to political and taxation uncertainties. The value of the fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short term.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the fund can be greater where derivatives are used in an extensive or complex way.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
