KEY RISKS

- The fund has money on deposit with companies such as banks or other financial institutions and invests in bonds which are issued by the government. If these companies or the government experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your fund may fall.
- The fund could lose money if any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- When interest rates are low and the fund's income is not enough to pay charges, the fund's capital will be used instead. This may reduce the potential for growth or cause the value of the fund to fall.
