

# Legal & General UK Equity Income Fund

Unit Trust (UCITS compliant) C-Class GBP

Base currency: **GBP**Domicile: **UK**

## FUND AIM

The objective of the Fund is to provide income and growth above those of the FTSE All Share TR Net Index, the "Benchmark Index". The Fund aims to outperform the Benchmark Index by 2% per annum. This objective is before the deduction of any charges and measured over rolling three year periods.

## RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time.

For more information, please refer to the Key Risks section on page 3.

## WHO IS THIS FUND FOR?

- This fund is designed for investors looking for a more specialist investment providing income and growth from an investment in UK company shares with recovery prospects.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

## FUND MANAGER COMMENTARY

The UK equity market performance was very strong in November, pushed upward by positive vaccine trial news fuelling a risk-on environment. Early results showed numerous vaccines in development to be over 90% effective and the UK government started to prepare for a vaccination program to begin in December. The combination of hopeful vaccine news and receding US political event risk drove strong equity performance in what proved to be one of the best months for global equity returns since the 1980s. In addition, the vaccine news brought a record style rotation, with Value and Recovery names outperforming Growth and Quality. Other news included the Bank of England announcing a further £150 billion stimulus and keeping interest rates on hold at 0.1% in order to boost spending in the UK economy. In terms of economic data releases, UK Gross Domestic Product expanded by just 1.1% in September, weaker than economists had expected.

The L&G UK Equity Income Fund outperformed against its benchmark in November. Stock selection positively contributed to the outperformance, with particular strength in Industrials and Financials. Sector allocation also made a positive contribution, driven by the underweight positioning in Healthcare and Utilities. By stock, the strongest performers were SSP Group, RSA Insurance and Taylor Wimpey. Underperforming names included Phoenix Group, GRIT Real Estate and Entain. There was no notable new activity in the period.

### STEPHEN MESSAGE

Stephen joined LGIM in 2017 as a Fund Manager for the UK Equity Income portfolios. He has been managing the UK Equity Income Trust since November 2017. Stephen joined from Old Mutual where he was responsible for the management of the Old Mutual UK Equity Income fund from 2009 until 2016. Prior to that, he was a Fund Manager at Bessemer Trust from 2006 until 2008. Stephen graduated from Imperial College London with a MEng in Aeronautical Engineering. He is also a CFA charterholder.

## ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO<sub>2</sub>) is the most significant contributor to greenhouse gas emissions which are driving climate change.

**4,753**  
Tonnes

CO<sub>2</sub>e<sup>i</sup> per \$1 million of market capitalisation

### CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figure is a measure of the size of carbon reserves held by the fund's underlying companies.

**118**  
Tonnes

CO<sub>2</sub>e per \$1 million of sales

### CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

Carbon emissions intensity describes the relationship between the carbon emissions of a company and its sales<sup>ii</sup>.

## NOTES

<sup>i</sup> Carbon dioxide equivalent (CO<sub>2</sub>e) is a standard unit to compare the emissions of different greenhouse gases.

<sup>ii</sup> The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

## KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the fund can be greater where derivatives are used in an extensive or complex way.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
