

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legal & General All Stocks Gilt Index Trust Class I Accumulation - ISIN: GB00B8344798

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide a combination of growth and income by tracking the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index, (the "Index"). This objective is after the deduction of charges and taxation.
 - The Index comprises government or other public bonds (a type of loan which pays interest) issued by the government of the United Kingdom (known as gilts) in accordance with the index provider's methodology.
 - The gilts that the Fund invests in will be investment grade bonds (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - The Fund seeks to replicate as closely as possible the constituents of the Index.
 - The Fund will have at least 90% exposure to assets that are included in the Index.
 - The Fund may also invest in government or other public bonds issued by the government of the United Kingdom which are reasonably expected to become part of the Index in the near future or are an alternative to a constituent of the Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Manager may only hold money market instruments and deposits for liquidity purposes to facilitate the redemption of units and the efficient management of the Fund.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Index.
 - Your units will be accumulation units. Income from the Fund's investments (interest) will be reinvested back into the value of your units.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund may be suitable for investors looking for a combination of growth and income from an investment in bonds issued by the UK government (known as gilts), as represented by the Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- We may take some or all of the ongoing charges from the Fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the Fund.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest

Entry charge 0.00%*

Exit charge 0.00%*

This is the maximum that might be taken out of your money before it is invested.

*The Fund also incurs a unit price spread. See opposite.

Charges taken from the fund over a year

Ongoing charge 0.15%

Charges taken from the fund under certain specific conditions

Performance fee None

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2019. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken partly from the income and partly from the capital of the Fund.

Other costs:

- **Unit price spread:** on any day, the prices for buying or selling units in this Fund are the same. However, there are maximum and minimum prices we can charge for units, reflecting the difference between the buying and selling prices of the assets in the Fund and costs associated with buying and selling the assets. From day to day we will set the unit price between the maximum and minimum depending on whether money is coming into or leaving the Fund.
- The difference between the maximum and minimum price, which is the most the price can change, can vary but as an example, the maximum price for units in this Fund was 0.06% higher than the minimum price at January 2020.
- For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at legalandgeneral.com/chargesandfees.

PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British pounds).
- The Fund will not replicate the performance of the Index perfectly due to the expenses, tax and transaction costs incurred by the Fund, which are not included in the Index.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1981.
- This unit class launched in 2012.
- The I class was launched on 20/12/12. Performance before this date is for M class, which has equivalent charges.
