

Legal & General Multi-Index Income 6 Fund

Unit Trust (NURS non-complex) I-Class GBP

FUND AIM

The fund objective is to provide a combination of income and capital growth and to keep the fund within a pre-determined risk profile. While this will be the fund's focus, it will have a bias towards investments that pay a higher income. The fund's potential gains and losses are likely to be limited by the objective to stay within its particular risk profile.

FUND RANGE

The fund is part of a range of risk targeted funds. The risk profile ranges from 1-10 with 1 being the least risky, and 10 being the most.

The fund targets risk profile 6. The level of risk in the fund is managed by restricting the types and proportions of the assets it holds.

We have selected Distribution Technology as our current risk profiler. Distribution Technology are an independent agency who provide risk profiling tools to advisers and fund managers.

WHO IS THIS FUND FOR?

- This fund is primarily designed for investors: who have received advice and had their attitude to risk assessed and matched to the risk profile of this fund but may be appropriate for those investors who have considered the risk profile of this fund with the others in the multi-Index range; who are looking for income or growth from an investment in company shares, company and government bonds (a type of loan that pays interest), cash and property. The fund will have a bias towards company shares.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.

HISTORICAL RISK PROFILE POSITIONING (RISK PROFILE 6)

FUND SNAPSHOT

- Aims to generate a stable income for investors while maintaining its risk profile
- A risk-profile targeted portfolio that has emphasis on UK and overseas equities and exposure to bonds for income and capital growth
- We actively adjust funds to give your assets the best chance of generating a sustainable and reliable income

Performance for the I Inc unit class in GBP, launched on 09 October 2015. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund.

Past performance is not a guide to the future.

The chart illustrates the positioning of the Multi-Index Income 6 fund since inception within the corresponding risk profile. LGIM calculations based on month-end target asset allocations and the variance-covariance matrix as provided by Distribution Technology at the time.

FUND MANAGERS

The fund managers have responsibility for managing the multi-index fund range. They are part of the Multi-Asset Funds (MAF) team in LGIM. This team focuses on designing and managing multi-asset funds that are tailored to match the specific objectives of various client types. The team sits within a wider Asset Allocation team which combines both depth of experience with a broad range of expertise from different fields, including fund management, investment consulting and risk management roles.

L&G European Index Trust	5.0
L&G Global Emerging Markets Index Fund	4.9
L&G Pacific Index Trust	4.8
iShares Euro Dividend UCITS ETF	4.0

RISK PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future. The fund is in category 4 because the mix of different asset types in which the fund invests has a balancing effect on the rate at which the fund share price moves up and down.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up. You may not get back the amount you originally invested.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- By investing in other funds this fund indirectly holds bonds and property that are traded through agents, brokers or investment banks or directly between buyers and sellers. This makes them less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell its holdings in other funds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depository.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
