Legal & General Cash Trust (the "Fund") Class I Accumulation ISIN: GB00B0CNHB64

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVE AND INVESTMENT POLICY

Objective

The objective of this Fund is to maintain capital and to provide a return in line with money market rates, before charges.

Investment policy:

- The Fund will generally invest in short term deposits, certificates of deposit, government bonds (predominantly UK) issued in pounds sterling (a type of loan which pays interest) and Repos. Repos are an agreement between two parties to sell or buy an asset and later reverse the trade at an agreed date and price.
- In stressed market conditions, the Fund may be invested up to 100% in government and public securities issued by a single issuer.
- The maximum maturity of the instruments the Fund invests in is 397 days but the Fund must maintain a weighted average maturity of less than 60 days.
- The bonds that the Fund invests in must be investment grade (rated as lower risk). Investment grade bonds are bonds that have achieved a higher credit rating from a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:

- reduce risk or cost; or
- generate additional capital or income with no, or an acceptably low, level of risk.

- The Fund may also invest in other fixed income securities, other money market instruments and collective investment schemes.

Other information:

- Your units will be accumulation units. Income from investments held by the Fund (interest) will be reinvested into the value of your units.

- The Fund's base currency is denominated in sterling (British pounds).
- This Fund is designed for investors looking to preserve their money from an investment in deposits and short term instruments.

- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This risk and reward indicator is based on historical data which may not be a reliable indication of the Fund's risk and reward category in the future.
- The category number highlighted above reflects the rate at which the Fund's unit price has moved up and down in the past. If the Fund has less than 5 years' track record, the number also reflects the rate at which a representative benchmark has moved up and down in the past. Higher numbers mean the potential reward could be greater, but this comes with increased risk of losing money.
- The Fund is in category 1 as it invests in instruments which are very liquid, have short maturities which have a high credit rating and are considered lower risk than longer maturing securities.
- The Fund's category is not guaranteed to remain the same and may change over time.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- When interest rates are low and if the Fund's income is not enough to pay charges, the Fund's capital will be used instead. This may cause the value of the Fund to fall.
- This Fund holds bonds that, rather than being traded on an exchange, are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments that are traded on an exchange and on any particular day there may not be a buyer or a seller for the bonds. In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for your Fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the Fund trustee or depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low interest rate environment. Bonds with a short time to go before their maturity date will fall by less than bonds with a longer time to their maturity date.
- The Fund has money on deposit with companies such as banks or other financial institutions and invests in bonds which are issued by the government. If these companies or the government experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your Fund may fall.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- This Fund is not the same as a bank or building society account. Your money is not protected under the UK deposit protection scheme.

However, there are maximum and minimum prices we can charge for units, reflecting the difference between the buying and selling prices of the assets in the Fund and costs associated with buying and selling the assets. From day to day we will set the unit price between the maximum and minimum depending on whether money is coming into or leaving the Fund.
