

Sterling Liquidity Plus Fund

Unit-Linked Life Insurance Reported in GBP (Gross of charges)

FUND AIM

The investment objective of the fund is to preserve capital over a 6 to 12-month horizon and generate an annual return above 3 month GBP LIBOR, over the course of a market cycle.

RISK AND REWARD PROFILE

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for less than one year. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- The trustees of UK registered and certain non-UK registered defined benefit occupational pension schemes, which may be classified as either retail clients or professional clients.
- There is no recommended minimum holding period.
- Please refer to your professional advisor who should be able to advise you on the suitability of this fund for your scheme.

FUND CHARACTERISTICS

The fund is invested predominantly in shares of the LGIM Sterling Liquidity Plus Fund ("SLF Plus Fund"), a sub fund of LGIM Liquidity Funds Plc.; an umbrella open-ended investment company incorporated in Ireland and authorised as an undertaking for collective investment in transferable securities (UCITS) by the Central Bank of Ireland. The Prospectus and Key Investor Information Document ("KIID") for the SLF Plus Fund are available on request. The SLF Plus Fund invests in a range of money market and fixed income investments including certificates of deposit, commercial paper, floating rate notes, government bonds, corporate bonds and asset-backed securities. The fund may also use derivatives for efficient portfolio management or risk management purposes.

LGIM LIQUIDITYTEAM MANAGEMENT

LGIM has a team-based approach to liquidity management which forms a strategic part of our asset management capability drawing on the expertise of over 70 investment professionals from our liquidity and fixed income teams globally.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up. You may get back less than the amount you originally invested.
- The return from your investment is not guaranteed and therefore you may receive a lower or higher return than you anticipated. There will be a variation in performance between funds with similar objectives due to the different assets selected.
- PMC's charges and associated transaction costs are subject to change, with notice for the former and without notice for the latter. Charges and transactions costs deducted from the policy reduce your potential for capital growth in the future.
- Tax rules and the treatment of income and capital gains could change in the future and may be applied retrospectively.
- Inflation reduces the purchasing power of money over time as the cost of purchasing goods and services increases. If the rate of inflation exceeds the rate of return on your portfolio, it will erode the value of your portfolio and its investments in real terms.
- In extreme market conditions it may be difficult to realise assets held for a fund and it may not be possible to redeem units at short notice. We may have to delay acting on your instructions to sell or the price at which you cancel the units may be lower than you anticipated.
- The value of a fund's assets may be affected by uncertainties such as international political developments, market sentiment, economic conditions, changes in government policies, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investment may be made.
- PMC seeks to mitigate counterparty risk wherever possible on behalf of its policyholders through a variety of measures which include: each fund's non-cash assets being held with independent custodians, sweeping cash (where appropriate) overnight into the LGIM's range of Liquidity funds (above a deminimus level), using the delivery versus payment system when settling transactions and the use of central clearing for exchange traded derivatives and forward foreign exchange transactions. However, in the event of the failure of a counterparty, custodian or issuer there is a residual risk that a fund may suffer asset losses which are unrecoverable.
