

# Legal & General Mixed Investment 20-60% Fund

Unit Trust (UCITS compliant) C-Class GBP

## FUND AIM

The objective of this fund is to provide growth of both capital and income. The fund will invest in a broad range of UK and overseas company shares, bonds and other assets. The fund will invest between 20 and 60% in company shares. Generally the fund will invest in these assets through other authorised investment funds.

## FUND RANGE

This fund sits within the L&G Mixed Investment Fund Range. The range aims to meet either growth or income client needs, with a choice of higher and lower risk options and with clearly defined equity exposure boundaries.

## WHO IS THIS FUND FOR?

- This fund is designed for investors looking to grow their money in an investment which can form a substantial part of their savings portfolio
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you

Performance for the C Acc unit class in GBP, launched on 30 June 2014. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund. The performance comparator is provided to give context to the performance. The Mixed Investment 20-60% Fund aims to achieve an attractive balance between risk and return, and does not aim to closely track the IA sector as a benchmark.

**Past performance is not a guide to future returns. The value of your investment and any income taken from it is not guaranteed and may go up and down.**

## RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

This fund is in category 4 because it invests, sometimes through other funds, in a variety of investments. A mixture of higher risk investments and lower risk investments has a balancing effect. The result is that this fund is lower risk than one investing only in company shares and higher risk than one investing only in investment grade bonds.

## KEY RISKS

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from Sterling (British Pounds). Any such investments will be impacted by exchange rate fluctuations and this may affect the value of your investment and any income from it. Currency hedging techniques may have been applied to reduce the impact of exchange rate fluctuations but may not entirely eliminate it.
- Investment returns on bonds are particularly sensitive to trends in interest rate movements. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low interest rate environment. Bonds with a longer time to go before their maturity date will fall by more than bonds with a short time to their maturity date.
- Credit ratings assigned to the individual assets in the fund can weaken and cause the value of those assets to fall.
- The fund invests in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your fund may fall.
- The fund could lose money if any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
