L&G ROBO Global®

Robotics and Automation UCITS ETF

DISRUPTIVE

Technology thematics range

Robotics and Automation

Key features

Exposure to a specialised basket of robotics and automation

Diversification across geography, market cap and sub-sectors

Potential for reduced volatility versus investing in individual robotics and automation stocks

Quarterly rebalancing maintains diversification and provides responsiveness to new entrants and market trends

UCITS compliant

As automation technologies are increasingly deployed in all aspects of our lives, the robotics and automation sector is expected to be worth \$1.2 trillion by 2025.¹ Increasing adoption of sophisticated robots, enhanced by artificial intelligence (AI), is fast becoming an instrument of profound change that is likely to leave a lasting impact on global productivity and future economic sustainability.

Legal & General Investment Management has partnered with ROBO Global®, a recognised provider of robotics and automation investable indices, to give investors a liquid, transparent and cost-effective vehicle to access this transformative megatrend.

DISRUPTIVE TECHNOLOGY PRODUCT RANGE

Our world is being transformed as a new wave of innovation, often technology-led, challenges every aspect of how we live and work.

Driving this megatrend is the unending quest for productivity improvement. For investors, it is making new investment opportunities, with the potential for higher growth than traditional investments, available today.

Our disruptive technology product range began with the first European robotics and automation ETF in 2014 and cyber security ETF in 2015. Battery value-chain, ecommerce logistics and pharma breakthrough ETFs were added in early 2018.

Know your robotics and automation exposure

PHYSICAL REPLICATION

L&G ROBO Global® Robotics and Automation UCITS ETF uses full physical replication to offer investors a truly specialised exposure.

INDUSTRY EXPERTISE

We believe the unrivalled expertise of the ROBO Global® advisory board ensures that the ROBO Global® Robotics and Automation UCITS Index (the index) is able to capture the entire value-chain of robotics and automation.

GROWTH DIVERSIFIER

The index has a typical market cap breakdown of 75% to small to mid-caps and 25% to large caps. It therefore, has less than 2% overlap with traditional benchmarks, such as the S&P 500 or the MSCI World.

BROAD GLOBAL EXPOSURE

The two-tier, equal-weighting scheme of the index ensures all companies in the industry are fairly represented. Because we are too early in the megatrend to confidently identify all of tomorrow's winners, this approach seeks to maximise exposure to the growth potential while mitigating any company specific risks in the basket.

The value of an investment and any income taken from it is not guaranteed and can go down as well as up. You may not get back the amount you originally invested.

Secondary Market

The shares of this exchange traded UCITS Fund are publicly admitted to trading on the secondary markets of the stock exchanges detailed in the Product Information table.

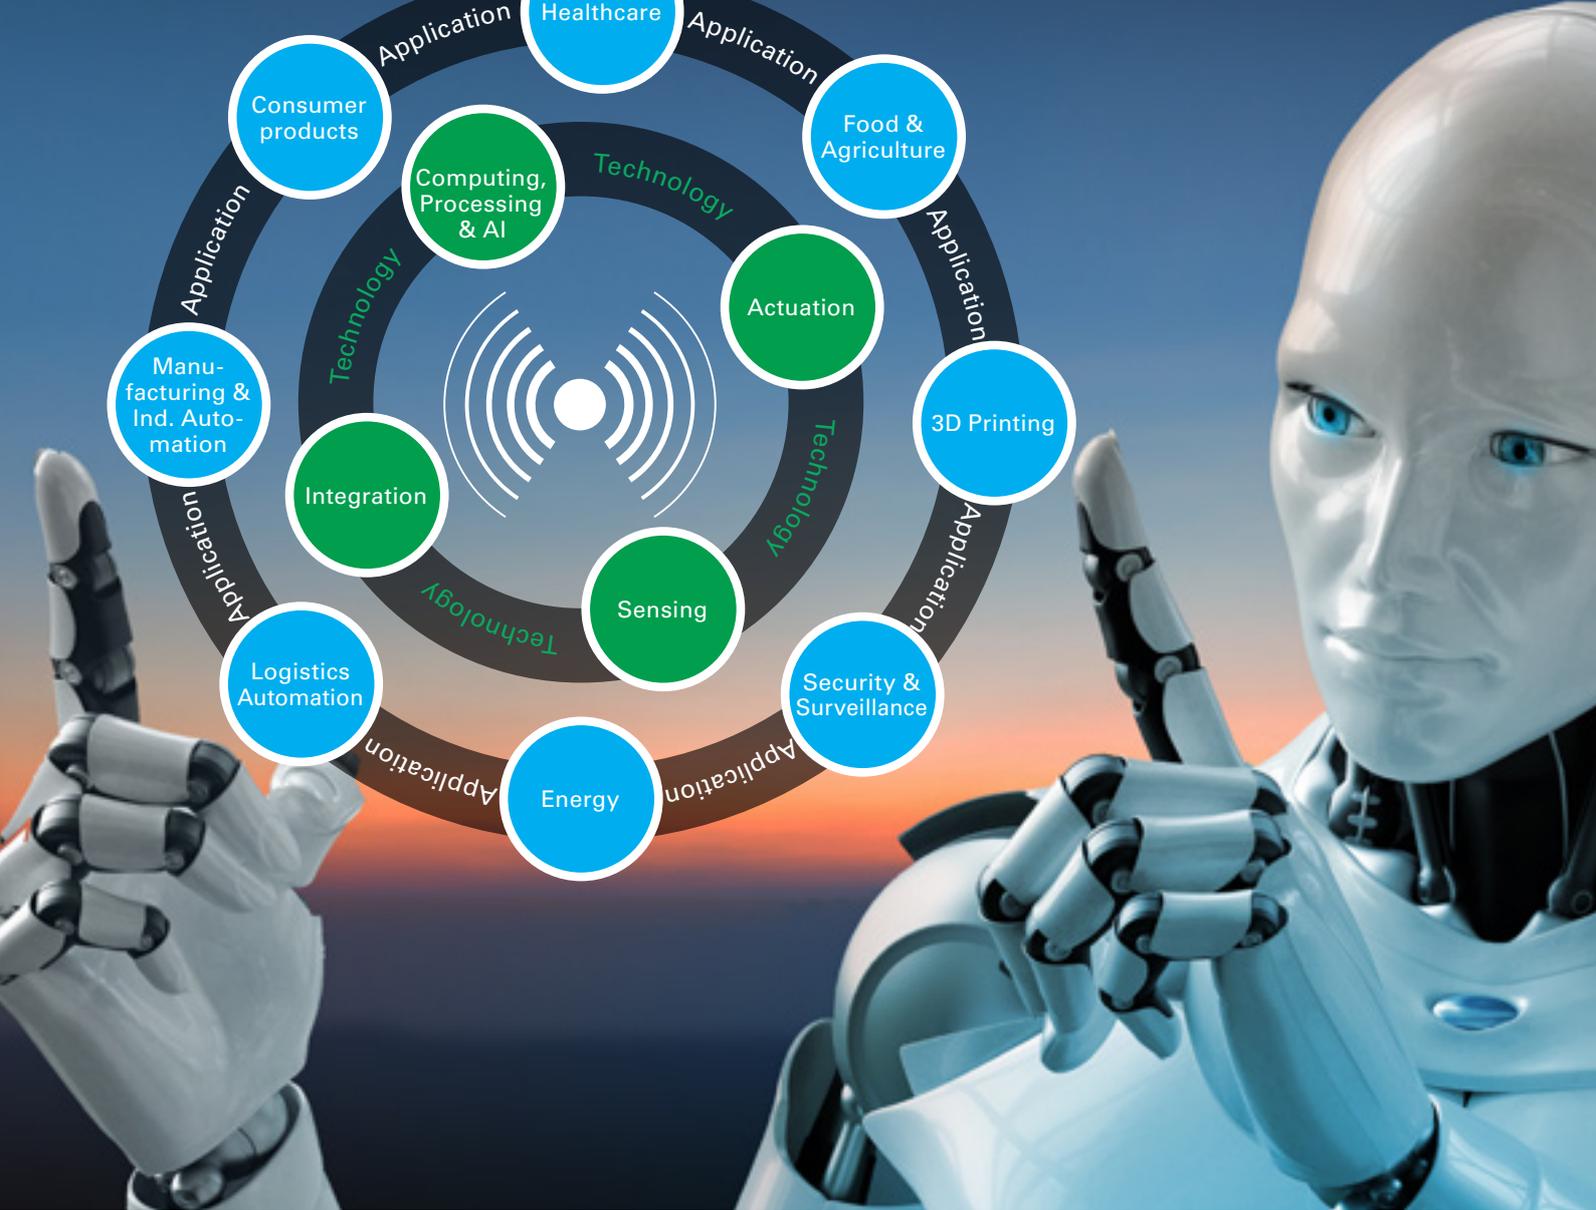

Product information

Fund Name	L&G ROBO Global® Robotics and Automation UCITS ETF
Benchmark	ROBO Global® Robotics and Automation UCITS Index
Listings and Tickers	London Stock Exchange – ROBO (USD), ROBG (GBX), ROBE (EUR) Deutsche Börse – IROB (EUR) Borsa Italiana – ROBO (EUR) NYSE Euronext – ROBO (EUR) SIX Swiss Exchange – ROBO (CHF)

UCITS Compliant	Yes
Domicile	Ireland
TER (%)	0.80
Base Currency	USD
Replication	Physical – Full replication
Distribution	Accumulating
Issuer	Issued by LGIM Managers (Europe)
Promoter	Legal & General Investment Management Limited

ROBO Global[®] industry classification

Weighting methodology

The index is weighted based on a bellwether (BW) and non-bellwether (NBW) classification. Bellwether companies are fast-growing companies whose core business model focuses around robotics and automation. Non-bellwether companies are largely established players whose businesses derive a distinct portion of their revenues from robotics and automation, and which have the potential to grow through their technology and innovation set.

The index follows a two-tier, equal weighing scheme, allocating to both BW and NBW companies to capture the growth prospects of both emerging and established companies. The index rebalances quarterly to maintain diversification and remain responsive to market trends and new entrants.
