FUND SUPPLEMENT

No.11

(A sub-fund of Legal & General UCITS ETF Plc, an umbrella investment company with variable capital and segregated liability between its Funds incorporated with limited liability in Ireland under registration number 459936).

The Company and the Directors, whose names appear on page 10 of the Prospectus, are the persons responsible for the information contained in this Fund Supplement and accept responsibility accordingly. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case), the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of the information.

This Fund Supplement contains information relating to the L&G Cyber Security UCITS ETF (the “Fund”) which is a separate Fund of Legal & General UCITS ETF Plc (the “Company”), an umbrella fund with segregated liability between its Funds. This Fund Supplement forms part of and should be read in the context of, and together with, the Company’s Prospectus dated 20 April 2020 and any other applicable addenda. Investors should also refer to the Company’s latest published annual report and audited financial statements (if any) and, if published after such report, a copy of the latest semi-annual report and unaudited financial statements. Capitalised expressions used and not defined in this Fund Supplement shall bear the meanings as set out in the Prospectus. If you are in any doubt about the action to be taken or the contents of this Fund Supplement, please consult your stockbroker, bank manager, lawyer, accountant or other independent professional adviser who, if such advice is taken in the United Kingdom, is an organisation or firm authorised or exempted pursuant to the FSMA.

Potential investors should consider the risk factors set out in the Prospectus and in this Fund Supplement before investing in this Fund. An investment in the Fund involves certain risks and may only be suitable for persons who are able to assume the risk of losing their entire investment.

The Prospectus sets forth information on investment risk, management and administration of the Fund, valuation, subscription, redemption and transfer procedures and details of fees and expenses payable by the Fund and should be read subject to the information herein.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The date of this Fund Supplement is 14 December 2021.

INVESTMENT OBJECTIVE

The investment objective of the L&G Cyber Security UCITS ETF (the “Fund”) is to provide exposure to publicly-listed companies from across the world that are involved in the cyber security industry.

INVESTMENT POLICY

In order to achieve this investment objective, the Fund will seek to track the performance of the ISE Cyber Security® UCITS Index Net Total Return (the “Index”), being an index comprised of equity securities issued by publicly-listed companies from across the world that are actively involved in the cyber security industry. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and **may have exposure to or invest directly up to 20% of its Net Asset Value in shares issued by the same body, which limit may be raised to 35% for a single issuer in exceptional market conditions, including (but not limited to) circumstances in which such issuer occupies a dominant market position.**

Where it is not possible or practicable for the Fund to invest directly in all of the component securities of the Index (for reasons such as, but not limited to, where this would involve difficulties or substantial costs, where one or more securities in the Index becomes temporarily illiquid or unavailable, or as a result of legal restrictions or regulatory limitations that apply to the Fund but not the Index) and/or where consistent with its investment objective, the Fund may also invest in the following additional assets subject to the conditions and within the limits laid down by the Central Bank:

- equity securities of companies involved in the technology sector that are not component securities of the Index, but the risk and return characteristics of which, individually or collectively, closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole;
- Depositary Receipts relating either to component securities of the Index or to equity securities of the type referred to in the bullet point immediately above; and
- FDIs – namely, total return “unfunded” OTC Swaps and exchange-traded equity futures – which may be used for investment purposes (such as gaining exposure to the Index and/or any particular constituents of the Index) in accordance with the terms set out in the sections entitled “*Fund Investments*”, “*Unfunded OTC Swap Model*” and Schedule II of the Prospectus. While the Fund may invest up to 100% of its Net Asset Value in total return “unfunded” OTC Swaps, it is not expected that this flexibility will be used. The Fund will only invest in FDIs as provided for in the RMP prepared by the Investment Manager in respect of the Fund and filed with the Central Bank.

The Fund may, in addition, employ other techniques relating to transferable securities, including investing in repurchase and reverse repurchase transactions and short term money market collective investment schemes, for the purpose of efficient portfolio management only, in accordance with the terms set out in the section entitled “*Efficient Portfolio Management Techniques*” and Schedule II of the Prospectus. While the Fund may invest up to 100% of its Net Asset Value in repurchase and reverse repurchase transactions it is not expected that this flexibility will be used.

TRACKING ERROR

The estimated anticipated (ex-ante) tracking error for the Fund in normal market conditions is 0.45% (annualised). Investors are specifically referred to the section headed “Tracking error” in the Prospectus.

SUSTAINABILITY

The Fund promotes a range of environmental and social characteristics. The characteristics promoted by the Fund are met by tracking an Index which includes the following features: exclusion of companies engaged in pure coal mining or companies that violate the UN Global Compact principles, as determined by the index provider's methodology. The Index is consistent with the environmental characteristics as it excludes such companies as set out in the "*Index Description*" section below.

The Manager aims to ensure that the issuers of investments in which the Fund is invested follow good governance practices. This is achieved by 1) setting expectations with the issuers' management with regard to good governance practices; 2) active engagement with the issuers; 3) utilising its voting rights; and 4) supporting policymakers and legislators to ensure a strong regulatory environment and standards. Active engagement with the issuers is used as a tool to drive progress and influence positive change and is conducted independently and in collaboration with industry peers and broader stakeholders. Engagement activities normally focus on specific material ESG issues and involve formulating an engagement strategy with regard to such issues with the aim to track and review the progress of the issuers during this process. Regular reporting on the outcomes of active engagement can be made available on request or can be found at: www.lgim.com.

TAXONOMY

While the Fund promotes environmental and social characteristics within the meaning of Article 8 of the SFDR, it does not currently commit to investing in "sustainable investments" within the meaning of the SFDR. Accordingly, it should be noted that the investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Regulation (EU) 2020/852 (the "**Taxonomy Regulation**") and, as such, the Fund's portfolio alignment with the Taxonomy Regulation is not calculated.

INDEX DESCRIPTION

The Index is designed to measure the performance of companies that derive all or a "material" proportion of their revenues from cyber security-related products and/or services across the following two sub-classifications:

- "*Infrastructure Provider*" companies that are direct service providers for cyber security in that they develop hardware and/or software that safeguards internal and external access to files, websites and networks; and
- "*Service Provider*" companies that utilise the foregoing tools to provide consulting and/or cyber security services to clients.

The Index is reconstituted on a quarterly basis. To be eligible for selection in the Index, companies must have a market capitalisation of at least USD 100 million and a trailing three-month average daily value traded of at least USD 1 million and their shares must be listed on one or more eligible stock exchanges. Each company within each of the above sub-classifications is equally weighted at the time of each quarterly reconstitution and the Index's exposure to each sub-classification is based on the cumulative market capitalisation of components within each sub-classification relative to the combined market capitalisation of both sub-classifications. The weights of the companies within each sub-classification are then subject to a final liquidity adjustment to ensure that less liquid companies are not overly represented in the Index.

The Index was developed by Nasdaq, Inc. and is calculated by Nasdaq, Inc.

Net Total Return

Total return indices measure the market performance, including price performance and income from regular cash distributions (cash dividends or capital repayments). This income is treated as being reinvested in the Index and thus makes up part of the total index performance. The Index is a *net* total return index which means that cash dividends declared by Index constituents are reinvested in

the Index on the ex-date and adjusted for an Index constituent's country of incorporation withholding tax rate. The withholding tax rates are set out in Appendix D of the methodology document published at: <https://indexes.nasdaqomx.com/docs/NQGIFamilyMethodology.pdf> and may be updated from time to time.

Rebalancing Frequency

The Index is reconstituted on a quarterly basis on the first index trading day following the third Friday in January, April, July and October (each, a "**Rebalance Date**"). Nasdaq shall publish all details relating to the adjustment of the Index composition (i.e. the actual weightings) on the first business day following each relevant Rebalance Date on the following website: <http://business.nasdaq.com/intel/indexes/research/nasdaq-global-index-policies/index.html>.

Further Information

The information set out above is a summary of the principal features of the Index and does not purport to be an exhaustive description. Further information with respect to the universe, component selection criteria, calculation and rebalancing methodology and treatment of corporate events can be found in the "*HUR Methodology*" for the ISE Cyber Security® UCITS Index which (as of the date of this Fund Supplement) is available, along with the constituents and weightings of the Index and various other informational materials, at: <https://indexes.nasdaqomx.com/Index/Overview/HUR>.

As at the date of this Fund Supplement, NASDAQ Inc. is not listed as a recognised benchmarks administrator and does not have its benchmarks listed on the public register maintained by ESMA under the Benchmark Regulation. The applicable registration requirements are subject to a transition period which remains open as at the date of this Fund Supplement. It is expected that NASDAQ Inc will file an application for recognition as a benchmarks administrator or for endorsement of its benchmarks in advance of the end of the transition period, in accordance with the requirements of the Benchmark Regulation

Portfolio Composition

The portfolio of Investments held by the Fund is available daily at <http://www.lgimetf.com>

PROFILE OF A TYPICAL INVESTOR

Only Authorised Participants may purchase for ETF Shares in the Fund directly from the Company. All other investors may acquire or purchase ETF Shares only through the secondary market.

It is expected that investors in the Fund will be informed investors who have taken professional advice and who understand (and are able to bear) the risk of losing their investment and who can accept the levels of risks associated with investing in global equity markets, in particular in cyber security-related companies.

RISK MANAGEMENT

The Fund's global exposure, being the incremental exposure and leverage generated by the Fund through its use of FDI, shall be calculated on at least a daily basis using the commitment approach and, in accordance with the requirements of the Central Bank, may at no time exceed 100% of the Fund's Net Asset Value. As noted in the "*Investment Policy*" section above, the Fund's use of FDI is an ancillary element of the investment policy in that it is an alternative means of gaining exposure to the Index, or one or more of the constituents of the Index, in circumstances where direct investment in the constituents of the Index is not possible, practicable or desirable. Regardless of whether exposure

to the underlying constituents is obtained by direct investment in the constituents, or by gaining exposure to the constituents through the use of FDI, the same notional value shall be committed to the investment by the Fund. Accordingly, it is not expected that the Fund will be leveraged.

RISK FACTORS

Investors are specifically referred both to the section headed “*Risk Factors*” and to Schedule II in the Prospectus and should consider the following risk factors prior to investing in the Fund:

1. The Fund invests primarily in the equity securities of companies whose business is focused on the cyber security industry and, as such, is particularly sensitive to risks to those types of companies. Companies in the cyber security field face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Cyber security companies may have limited product lines, markets, financial resources or personnel. The products of cyber security companies may face obsolescence due to rapid technological developments and frequent new product introduction, and such companies may face unpredictable changes in growth rates, competition for the services of qualified personnel and competition from foreign competitors with lower production costs. Companies in the cyber security field are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights may adversely affect the profitability of these companies. Additionally, companies in the cyber security field may be the target of cyber attacks, which, if successful, could significantly or permanently damage a company’s reputation, financial condition and ability to conduct business in the future.
2. The Index is typically comprised of a mix of micro, small, mid and large capitalisation companies. Micro, small and mid-capitalisation companies may be more vulnerable to adverse business or economic events than larger, more established companies and may underperform other segments of the market or the equity market as a whole. Securities of micro, small and mid-capitalisation companies generally trade in lower volumes, are often more vulnerable to market volatility and are subject to greater and more unpredictable price changes than larger capitalisation stocks or the stock market as a whole.

THE SHARES

The Fund currently has a single class of ETF Shares as set out in the table immediately below. Additional classes of Shares may be added in the future in accordance with the requirements of the Central Bank.

Share Class	Share Class Type	Minimum Subscription / Redemption Amount	TER*	Dividend policy
USD Accumulating ETF	ETF Shares	50,000 Shares	0.69%	N/A

* Expressed as a % per annum of the Net Asset Value of the Share class.

Shares are freely transferable subject to and in accordance with the provisions of the Articles and as set out in the Prospectus.

As with other Irish companies limited by shares, the Company is required to maintain a register of Shareholders. ETF Shares will be held by the Common Depository’s Nominee (as registered holder) in registered form. Only persons appearing on the register of Shareholders (i.e. the Common Depository’s Nominee) will be a Shareholder. Fractional Shares will not be issued. No temporary documents of title or Share certificates will be issued (save for the Global Share Certificate, as set out in the Prospectus). A trade confirmation will be sent by the Administrator to the Authorised Participants.
