

# Legal & General Growth Trust

Unit Trust (UK UCITS compliant) C-Class GBP

Base currency: **GBP**

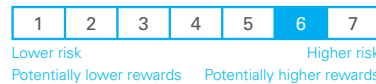

Domicile: **UK**

## FUND AIM

The objective of the Fund is to provide growth above that of the FTSE All Share TR Net Index, the "Benchmark Index". The Fund aims to outperform the Benchmark Index by 4% per annum. This objective is before the deduction of any charges and measured over rolling three year periods.

## RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

This fund is in category 6 because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds, cash or commercial property.

For more information, please refer to the Key Risks section on page 4.

## WHO IS THIS FUND FOR?

- This fund is designed for investors looking for growth from an investment in company shares from the UK.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

## FUND MANAGER COMMENTARY

It was another bumpy ride for equity investors as rising rates started to shape markets as part of the transition of the economic recovery phase. The wide dispersion of performance across regions and sectors reflected the relative exposure to the deflation and reopening trades. This has accelerated the rotation from growth and quality assets into value sectors.

At a high level, vaccine roll-out progress and evidence that lockdown restrictions are working reinforced the view that global growth is likely to turn sharply higher in the coming months. The UK budget saw the Chancellor make a decision to use all the available fiscal resources to provide additional support to the economy over the next twelve months. On earnings, the UK reporting season moves up a gear in March, where it should then be clearer whether the recent improvement in earnings revision ratios can be sustained.

The L&G Growth Trust delivered a positive return though underperformed its benchmark. On stock selection, our exposure within Consumer Services, Basic Materials and Financials detracted value. For positioning, the main detractors were the underweight in Energy and Financials. At the stock level, we saw positive performance from ASOS, Wizz Air and Network International. The largest active detractors were Ocado Group, JustEat Takeaway, Experian, FeverTree and Aveva. Not owning HSBC, Prudential, Barclays, Rio Tinto and BHP also detracted from relative returns. For activity, we introduced a new position in logistics real estate investment company, Tritax Big Box REIT, and exited our holding of affordable retailer B&M Value Retail.

### GAVIN LAUNDER

Gavin joined LGIM in 2007 and has been the Fund Manager for the UK Growth Trust since September 2014. Previously, he was a Global Equities Analyst at BlueBay Asset Management. Gavin spent the majority of his buy-side career as a Portfolio Manager with UBS O'Connor. Prior to this, he was a top-rated, sell-side analyst covering the Autos, Capital Goods and Conglomerates sectors at investment banks including SG Warburg (now part of UBS) and Goldman Sachs. Gavin holds a degree in Philosophy and Economics from University College, London.

## ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO<sub>2</sub>) is the most significant contributor to greenhouse gas emissions which are driving climate change.

0  
Tonnes

CO<sub>2</sub>e<sup>i</sup> per \$1 million of market capitalisation

### CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figure is a measure of the size of carbon reserves held by the fund's underlying companies.

121  
Tonnes

CO<sub>2</sub>e per \$1 million of sales

### CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

Carbon emissions intensity describes the relationship between the carbon emissions of a company and its sales<sup>ii</sup>.

## NOTES

<sup>i</sup> Carbon dioxide equivalent (CO<sub>2</sub>e) is a standard unit to compare the emissions of different greenhouse gases.

<sup>ii</sup> The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

**KEY RISKS**

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
