Manager's Investment Report

Investment Objective and Policy

The objective of the Fund is to track the performance of the Markit iBoxx Sterling Non-Gilts ex BBB Index (after adjustment for management charge and taxation).

The Fund will invest primarily in the securities that make up the constituents of the Markit iBoxx Sterling Non-Gilts ex BBB Index. Securities in the Markit iBoxx Sterling Non-Gilts ex BBB Index will be held with weightings generally proportionate to their issuance of debt.

The Fund may hold derivatives for the purpose of Efficient Portfolio Management.

Manager's Investment Report

During the period under review, the bid price of the Fund's I-Class accumulation units rose by 0.31%. Markit iBoxx, the Index compiler, calculates the benchmark Index at the end of the business day using closing prices, whereas the Fund is valued using prevailing prices at 12 noon. Therefore, for tracking purposes, the Fund has been revalued using closing prices. On this basis, over the review period, the Fund rose by 0.05%, compared with the Index fall of 0.06% (Source: Bloomberg), producing a tracking difference of +0.11%.

Past performance is not a guide to future performance.

The value of investments and any income from them may go down as well as up.

Market/Economic Review

The major international bond markets struggled to make headway in local currency terms although as with equities, currency movements translated into a modest gain for Sterling-based investors. Central banks have continued to withdraw the extraordinary monetary support that has been in place since the global financial crisis. The US Federal Reserve (Fed) raised interest rates by 0.25% in June and again in September, signalling another hike before the year-end and further tightening in 2019. The Fed also continued unwinding its asset purchase programme, known as quantitative easing (QE).

Although the European Central Bank announced it would cease its QE programme at the end of 2018, the central bank has reassured investors that it would not raise interest rates at least until mid-2019.

Gilts ended the review period marginally higher, as investors became more concerned about the global economic outlook for 2019. The theme of monetary tightening had dominated the market during the third quarter. Although early August's 0.25% UK interest rate rise had been largely priced in, the unanimous Monetary Policy Committee vote surprised investors, particularly so with uncertainty surrounding Brexit negotiations. Index-linked gilts marginally outperformed their conventional counterparts as inflation remained above its 2% target. Sterling-denominated corporate bonds have underperformed gilts, affected by concerns about the UK economic outlook and corporate profits, with the deadline for the conclusion of UK Brexit negotiations fast approaching.

Fund Review

All investment activity was prompted either by unit holder activity or by monthly changes in the profile of the benchmark Index.

During the period 36 bonds were added to the Index. 28 of these were new issues, 8 were bonds upgraded from a BBB to an A rating. 6 bonds left the Index after being downgraded to a BBB rating. 13 bonds exited the Index after falling below one year to maturity, 3 bonds exited the Index following tender offers which left the amount outstanding below the minimum required. The Fund participated in 47 new issues and tap auctions across sectors such as telecoms, financials, utilities, housing associations, consumer goods and mortgage-backed securities.

The Fund experienced net positive cash flow during the period. The cash flows were used to adjust the Fund's holdings in such a way so as to ensure the Fund maintained an Index distribution at all times. The Fund was also rebalanced at each month end in line with the revised Index distribution.

Outlook

Looking ahead, the near-term global growth outlook remains solid despite some pockets of weakness in recent months (Japan, Euro area, parts of Emerging Markets). Global manufacturing has slowed, but as underlying demand is steady and inventories near neutral, growth should stabilize slightly below trend. We still believe that Brexit negotiations will be a leading driver of relative performance during the first quarter of 2019 with parliament unlikely to have a meaningful vote until the beginning of next year, the potential for material news (in either direction) should occur in the next few months. The BoE is likely to stay on hold with regards to monetary policy until next year (May is our base case as the transition period should be in place by then). Risks of two hikes in 2019 have faded in light of the sharp oil price decline.

The Fund remains well placed to capture the performance of the Index.

Risk and Reward Profile

- This risk and reward profile is based on historical data which may not be a reliable indication of the Fund's risk and reward category in the future.
- The category number highlighted above reflects the rate at which the Fund's unit price has moved up and down in the past. If the Fund has less than five years' track record, the number also reflects the rate at which the Index the Fund tracks has moved up and down in the past. Higher numbers mean the potential reward could be greater, but this comes with increased risk of losing money.
- The Fund is in category three because it invests in investment grade bonds which generally provide higher rewards and higher risks than investments in cash and lower rewards and lower risks than investments in sub-investment grade bonds or company shares.
- The Fund's category is not guaranteed to remain the same and may change over time.
- Even a fund in the lowest category is not a risk free investment.

Information on Tracking Error

The 'Tracking Error' of a Fund is the measure of the volatility of the differences between the return of the Fund and the return of the benchmark Index. It provides an indication of how closely the Fund is tracking the performance of the benchmark Index after considering things such as Fund charges and taxation.

Using monthly returns, over the review period, the annualised Tracking error of the Fund is 0.11%, whilst over the last three years to the end of October 2018, the annualised Tracking Error of the Fund is 0.10%. These Tracking Errors are within the anticipated Tracking Error levels set out in the Fund's Prospectus of +/-0.50% per annum.

EU Savings Directive

The Fund has been reviewed against the requirements of the Directive 2003/48/EC on Taxation of savings in the form of interest payments (ESD), following the HM Revenue & Customs debt investment reporting guidance notes.

Under the Directive, information is collected about the payment of distributions to residents in certain other countries and is reported to HM Revenue & Customs to be exchanged with Tax authorities in those countries.

The Fund falls within the 25% debt investment reporting threshold. This means that details of all distributions and redemption proceeds paid to non UK investors will be reported by Legal & General (Unit Trust Managers) Limited to HM Revenue & Customs to be exchanged with the relevant Tax authorities.

General Information continued

Dual Pricing Arrangement

The Manager's fixed dual pricing arrangement has a set spread to account for the costs of transacting in a particular Fund. Where the Manager operates a box through which unit subscriptions and unit redemptions are netted into a single trade instruction to the Trustee, the netting reduces the actual transaction costs and this generates a revenue to the Manager. The revenue generated from this activity is calculated on a monthly basis and returned to the Fund in the form of a payment from the Manager. This provides an enhanced return to the Fund, though the size of any return will be dependent on the size of subscriptions and redemptions.
