## INDEX TRACKING

The Fund aims to provide exposure to stock market investment but without all the risk attached to individual stock selection. This produces low tracking error and limited stock picking or 'style' risks. The Fund takes a pragmatic approach to trading on index changes and cash flow and has lower management fees than active funds. This Fund is based on the S&P Global 100 Index.

### TRACKING ERROR (%)

3 years	4 years	5 years	7 years	10 years	Launch
0.07	0.06	0.06	0.06	0.07	4.97

The tracking error figures shown are annualised and are calculated using gross of fee returns based on LGIM's internally calculated valuations. The gross of fee performance figures are calculated on a total return basis and have been adjusted to exclude the impact of uninvested cash balances within the income and revenue account. The gross performance numbers are an indication of fund manager skill and are not reflective of true fund performance. True fund performance priced at official valuation points are calculated by Lipper and available above. Please note that on occasion, difference in the treatment of withholding tax between fund and benchmark can be significant and lead to the appearance of heightened relative returns on overseas equity funds. The fund launched on 04 November 2002.

### INDEX FUND MANAGEMENT TEAM

The Index Fund Management team comprises 25 fund managers, supported by two analysts. Management oversight is provided by the Global Head of Index Funds. The team has average industry experience of 15 years, of which seven years has been at LGIM, and is focused on achieving the equally important objectives of close tracking and maximising returns.

**KEY RISKS**

- The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
