Global Emerging Markets Index Fund

**Annual Manager's
Short Report
for the year ended

Investment Objective and Policy

The objective of the Fund is to track the capital performance of global emerging equity markets, as represented by the FTSE All-World Emerging Index.

The Manager will seek to achieve the investment objective by investing primarily in securities that make up the constituents of the FTSE All-World Emerging Index. The Fund may also invest in stocks which are reasonably expected, at the investment manager's discretion to become part of the Index. Securities will be held with weightings generally proportionate to their market capitalisation. The Fund may hold depository receipts and derivatives both for efficient portfolio management and investment purposes.

The Fund may also invest in other transferable securities, equities, permitted deposits, money market instruments, cash, near cash and units in collective investment schemes.

Risk Profile

Market Risk

Market risk arises mainly from uncertainty about future prices. It represents the potential loss the Fund may suffer through holding market positions in the face of market movements. The Manager adheres to the investment guidelines and in this way, monitors and controls the exposure to risk from any type of security, sector or issuer.

This Fund invests in securities which are issued by companies in Emerging Markets and therefore, there is likely to be increased volatility in price movements. The securities may also be less liquid than securities on larger exchanges which are generally traded more frequently.

Currency Risk

This Fund is invested in overseas financial securities. The performance of the Fund may therefore be affected by changes in exchange rates. This risk may be managed by the use of forward currency contracts, which aim to manage the effect of changing exchange rates.

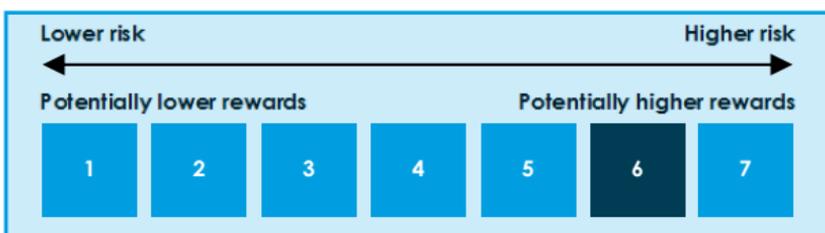

Fund Facts

Period End Dates for Distributions:	31 July	
Distribution Dates:	30 September	
Ongoing Charges Figures:	31 Jul 18	31 Jul 17
R-Class	0.92%	0.97%
F-Class	0.57%	0.57%
I-Class	0.33%	0.33%
C-Class	0.23%	0.23%
L-Class	0.18%	0.18%

The Ongoing Charges Figure (OCF) is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund.

The OCF is intended to provide a reliable figure which gives the most accurate measure of what it costs to invest in a fund and is calculated based on the last period's figures.

Risk and Reward Profile

- This risk and reward profile is based on historical data which may not be a reliable indication of the Fund's risk and reward category in the future.
- The category number highlighted above reflects the rate at which the Fund's unit price has moved up and down in the past. If the Fund has less than five years' track record, the number also reflects the rate at which the Index the Fund tracks has moved up and down in the past. Higher numbers mean the potential reward could be greater, but this comes with increased risk of losing money.
- The Fund is in category six because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- The Fund's category is not guaranteed to remain the same and may change over time.
- Even a fund in the lowest category is not a risk free investment.

Manager's Investment Report

During the year under review, the bid price of the Fund's R-Class distribution units rose by 2.11%. FTSE, the Index compiler, calculates the benchmark Index at the end of the business day using closing prices, whereas the Fund is valued using prevailing prices at 12 noon. Therefore, for tracking purposes the Fund has been revalued using closing prices and foreign exchange rates. On this basis over the review year, the Fund rose by 2.80%, compared with the FTSE All-World Emerging Markets Index performance of 2.75% (Source: Bloomberg), producing a tracking difference of +0.05%.

Past performance is not a guide to future performance.

The value of investments and any income from them may go down as well as up.

Exchange rate changes may cause the value of any overseas investments to rise or fall.

Market/Economic Review

A combination of an improving global economic outlook, low inflation and supportive central bank policies has underpinned equity markets worldwide over the last 12 months. However, there was a spike in market volatility during the first quarter of 2018 with escalating trade tensions between the US and China triggering a sell-off.

After performing strongly in late 2017 as confidence in the global economic outlook remained robust, emerging market equities subsequently faltered, underperforming their global market peers over the 12 months as a whole. Concerns over the likely pace and extent of future US interest rate rises and the growing risk of a global trade war impacted on investors' appetite for risk. In regional terms, Latin American markets underperformed other emerging markets, weighed by growing domestic political risks and resistance to economic reform, particularly in Brazil. However, Asian markets showed greater resilience, largely reflecting ongoing confidence in the region's economic prospects.

Fund Review

Companies held within the Fund are held with weightings generally proportionate to those of the benchmark Index. Therefore, investment activity, other than to raise or invest cash, is only necessary when there are changes to the benchmark Index or as a result of a corporate action.

Manager's Investment Report continued

The September 2017 semi-annual review resulted in 42 additions and 12 deletions. The additions were primarily concentrated on the addition of Chinese Depository receipts listed in the US following a change in the FTSE ground rules. There were a further 50 changes to the free share capital of constituents with the largest increases being Grasim Industries (India), Vale (Brazil) and Bharti Infratel (India) and the largest decreases being Vale (Brazil) Preference Shares, ICICI Bank (India) and Kotak Mahindra Bank (India). The total two-way Index turnover was 7.0%.

At the December 2017 quarterly Index review, there were five additions including Guotai Junan Securities (China) and Wuxi Biologics Cayman (China) and two deletions, the significant deletion was Kotak Mahindra Bank (India). There were a further 84 changes to the free share capital of constituents with the largest increases being Alibaba Group ADR (N Shares) (China), Baidu ADR (N Shares) (China) and JD.com ADR (N Shares) (China) and the largest decreases being Reliance Industries (India), ICICI Bank (India) and IndusInd Bank (India). Total two-way Index turnover was 4.8%.

At the March 2018 semi-annual Index review, there were 35 additions and 23 deletions. The largest additions were YY ADR (China), Globalwafers (Taiwan) and CIFI (China). The largest deletions were Hotai Motor (Taiwan) and JG Summit (Philippines). Both Siam Cement (Thailand) and Magnit GDR (Russia) had a different listing replace the existing security in the Index resulting in no net impact on their respective weights within the Index. There were a further 72 changes to the free share capital of constituents with the largest increases being Alibaba Group ADR (N Shares) (China), Baidu ADR (N Shares) (China) and JD.com ADR (N Shares) (China) and the largest decreases being Infosys (India), ICICI Bank (India) and IndusInd Bank (India). Total two-way Index turnover was 7.39%.

At the June 2018 quarterly Index review, there were six additions including HDFC Standard Life Insurance (India) and Future Retail (India) and two deletions, the significant deletions were ICICI Bank (India) and IndusInd Bank (India). There were a further 317 changes to the free share capital of constituents with the largest increases being Alibaba Group ADR (N Shares) (China), Baidu ADR (N Shares) (China) and Qatar National Bank (Qatar). The largest decreases were Malayan Banking (Malaysia), Sberbank (Russia) and America Movil (Mexico). Total two-way Index turnover was 6.07%.

Outlook

From our perspective, there are three key risks of which to be mindful: that inflation could rise faster than expected, a further strengthened US Dollar which would squeeze other nations and trade wars. On the latter, the existing set of tariffs on steel, aluminium and solar panels are relatively small. However, it is the significant escalation that could cause wider issues. Escalation

Manager's Investment Report continued

increases the risk of a more negative financial market reaction and damage to business and consumer confidence. While tariffs on steel and aluminium are less visible to consumers, widespread tariffs will hit high-profile consumer goods such as electronics and clothing. If a full-scale trade war becomes a reality, we see it as inflationary and negative for US, Chinese and global growth.

The Fund remains well positioned to capture the performance of the Index.

Information on Tracking Error

The 'Tracking Error' of a Fund is the measure of the volatility of the differences between the return of the Fund and the return of the benchmark Index. It provides an indication of how closely the Fund is tracking the performance of the benchmark Index after considering things such as Fund charges and taxation.

Using monthly returns, over the review year, the annualised Tracking Error of the Fund is 0.97%, whilst over the last three years to the end of July 2018, the annualised Tracking Error of the Fund is 1.05%. These Tracking Errors are within the anticipated Tracking Error levels set out in the Fund's Prospectus of +/-1.50% per annum.

F-Class	£500
I-Class	£1,000,000
C-Class	£100,000,000
L-Class	£100,000

In addition, monthly contributions can be made into the R-Class with a minimum amount of £20, and F-Class with a minimum amount of £50 per month.

F-Class units are only available to:

- i) investors who have received advice from authorised intermediaries, platforms or other distributors in relation to their investment in units in the Fund and
- ii) distributors who the Manager reasonably considers will adequately bear the costs of marketing to and acquiring investors at no or limited cost to the Manager, and to whom the Manager has confirmed that such distributor or investor meets the criteria for investment in such units.

C-Class units are only available to distributors who actively market and distribute such units (or whom the Manager believes intends to do so) and to whom the Manager has confirmed by letter that they meet the criteria for investment in such units.

L-Class units are not available to retail customers and are intended only for investment by Legal & General group companies.
