

Legal & General Diversified Fund

Unit Trust (NURS non-complex) C-Class GBP

Base currency: **GBP**Domicile: **UK**

FUND AIM

The Fund's objective is to provide a combination of capital growth and income. The Fund aims to achieve a total return of both income and capital of the Bank of England Base Rate +3.75% per annum (the "Benchmark"). This objective is before the deduction of any charges and measured over rolling five year periods. Whilst the Fund aims to achieve its objective, there is no guarantee that this will be achieved over that period or any other period and capital invested in the Fund is at risk.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRRI) is based on the historic volatility of the fund's value and it may change in the future.

The Fund is in category 5 because the mix of different asset types in which the Fund invests has a balancing effect on the rate at which the Fund share price moves up and down. This type of fund is generally considered to be higher risk than one investing only in bonds and lower risk than one existing only in company shares.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This Fund is designed for investors looking for a combination of capital growth and income through exposure to a diverse portfolio of investments
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- By investing in other funds this fund indirectly holds bonds and property that are traded through agents, brokers or investment banks or directly between buyers and sellers. This makes them less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell its holdings in other funds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depositary.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
