## KEY RISKS

- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Any such investments will be impacted by exchange rate fluctuations and this may affect the value of your investment and any income from it. Currency hedging techniques may be applied to reduce the impact of exchange rate fluctuations but may not entirely eliminate it.
