INDEX FUND MANAGEMENT TEAM

The Index Fund Management team comprises 25 fund managers, supported by two analysts. Management oversight is provided by the Global Head of Index Funds. The team has average industry experience of 15 years, of which seven years has been at LGIM, and is focused on achieving the equally important objectives of close tracking and maximising returns.

KEY RISKS

- The value of an investment is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The fund invests in smaller companies. Investments in smaller companies tend to be riskier than investments in larger companies because they can: be harder to buy and sell; or go up and down in value more often and by larger amounts, especially in the short term. In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for your fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the fund trustee or depositary.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
