

# Legal & General UK Select Equity Fund

Unit Trust (UCITS compliant) I-Class GBP

Base currency: **GBP**

Domicile: **UK**

## FUND AIM

The objective of this Fund is to provide growth above that of the FTSE All Share TR Net Index, the "Benchmark Index". The Fund aims to outperform the Benchmark Index by 3% per annum before charges, over rolling three year periods.

## RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

This fund is in category 6 because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds, cash or commercial property.

For more information, please refer to the Key Risks section on page 3.

## WHO IS THIS FUND FOR?

- This fund is designed for investors looking for growth from an investment in UK shares.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

## FUND FACTS

Fund size <b>£310.1m</b>	Fund launch date <b>2 Jan 1996</b>

For annual performance against the performance objective please see the Key Investor Information Document (KIID). Performance for the I Inc unit class in GBP, launched on 31 October 2012. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund.

**Past performance is not a guide to the future.**

## FUND SNAPSHOT

- **What does it invest in?** Invests at least 90% in shares of UK companies. The proportion of the fund invested in a company can vary between -10% and +5% of the weighting of that company in the Index.
- **How does it invest?** Actively managed, with holdings in between 30 and 60 companies on average over a typical market cycle of 3-5 years, which means the fund may be concentrated at times.

## FUND MANAGER COMMENTARY

UK equity markets unquestionably suffered from a case of investor fatigue as mid-month gains were relinquished and the region closed the month in negative territory. Following a surge in economic surprises through Q2, the latest economic data has turned more mixed and second wave COVID fears are most certainly increasing. As a consequence, the tug of war between two opposing market forces could extend market volatility over the coming months.

UK equity market performance proved disappointing in July, with cyclicals and value stocks hit hard during the second half of the month. Mid-caps did enjoy strong relative performance. By sector, Technology, Materials, Healthcare and Utilities outperformed. Telecoms, Financials, Consumer Services and Industrials were out of favour. On the FX front, the falling dollar has also become a driver of equity performance, which has been unhelpful for UK large-caps.

The fund delivered a small negative return of -0.2% in July, which reflected healthy outperformance of its benchmark. Stock selection made a strong contribution, led by gains within our Consumer Services, Financials and Telecoms exposure. Sector allocation was also positive, driven by the underweight in Oil & Gas. At the individual company level, B&M Value Retail, Croda, Aston Martin Lagonda, Fevertree Drinks and Helios Towers were the main positives. On the flipside, SSP Group and Melrose were the main detractors.

For trading activity, there were no significant changes in the period.

### GAVIN LAUNDER

Gavin joined LGIM in 2007 and has been the Fund Manager for the UK Select Equity Fund since June 2018. Previously, he was a Global Equities Analyst at BlueBay Asset Management. Gavin spent the majority of his buy-side career as a Portfolio Manager with UBS O'Connor. Prior to this, he was a top-rated, sell-side analyst covering the Autos, Capital Goods and Conglomerates sectors at investment banks including SG Warburg (now part of UBS) and Goldman Sachs. Gavin holds a degree in Philosophy and Economics from University College, London.

## ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO<sub>2</sub>) is the most significant contributor to greenhouse gas emissions which are driving climate change.

**1,077**  
Tonnes

CO<sub>2</sub>e<sup>i</sup> per \$1 million of market capitalisation

### CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figure is a measure of the size of carbon reserves held by the fund's underlying companies.

**123**  
Tonnes

CO<sub>2</sub>e per \$1 million of sales

### CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

Carbon emissions intensity describes the relationship between the carbon emissions of a company and its sales<sup>ii</sup>.

### NOTES

<sup>i</sup> Carbon dioxide equivalent (CO<sub>2</sub>e) is a standard unit to compare the emissions of different greenhouse gases.

<sup>ii</sup> The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

**KEY RISKS**

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

For more information, please refer to the key investor information document on our website [↗](#)

**LATEST DISTRIBUTION INFORMATION**

For distributing unit classes, the latest payments are shown below. Please note that these payments are not guaranteed, are at the discretion of the manager and may be paid out of capital.
