Unit Trust (UCITS compliant) C-Class GBP

Base currency: **GBP**

Domicile: **UK**

FUND AIM

The objective of the Fund is to provide income and growth above those of the FTSE Asia Pacific ex-Japan TR Net Index (the "Benchmark Index"). The Fund aims to outperform the Benchmark Index by 2% per annum. This objective is before the deduction of any charges and measured over rolling three year periods.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time.

For more information, please refer to the Key Risks section on page 3.

FUND MANAGER COMMENTARY

July was a turbulent month in geopolitical terms. Tensions rose further between Washington and Beijing as the US removed Hong Kong's special trading status, called China's claims to the South China Sea unlawful and closed down China's Houston consulate alleging espionage. China responded by ordering the closure of the US's consulate in Chengdu. Despite this the broad Asia Pacific ex Japan index returned +1.5% in GBP terms, led by further technology outperformance.

The fund returned -3.3% in GBP terms as, despite America's actions, China outperformed the rest of the Asia-Pacific following Chinese state media ordering a "healthy bull market". Being underweight China hurt from an allocation perspective and was made worse by negative stock selection within it. Our overweight exposure to Australia also detracted given the resurgence in COVID-19 cases and regional lockdowns being re-imposed.

This was partially offset by favourable allocation to and stock selection within Taiwan. Over the month TSMC, our largest holding, rallied +29% after strong Q2 results and signs that Intel might increasingly outsource foundry operations to TSMC. Hyundai Motor also had a strong month (+19%) given the South Korean government's latest policy announcement encouraging its Electric Vehicle industry.

During the month, Downer raised capital to strengthen its balance sheet, buy out the last major shareholder of one of its subsidiaries, and positively restructure its operations. We supported this by taking up our entitlement, which was offered at a 10% discount.

PAUL HILLSLEY

Paul joined LGIM in 2006 and is the lead fund manager for the Asian income portfolios. He has managed the Asian Income Trust since its inception. He began his investment career in 1991 at Phillips and Drew Fund Management, now called UBS Global Asset Management, and developed broad experience across UK, Europe, Japan and, predominantly, Asia ex Japan, over subsequent years. At LGIM Paul launched the Asian Income Trust in November 2008 and in 2013 formed the Global Income Team which, together with Andrew Koch, Stephen Message and Camilla Ayling forms the core of the firm's equity income expertise. He read engineering, economics and management at Lincoln College, Oxford University, and is an associate of the Society of Investment Professionals.

ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO₂) is the most significant contributor to greenhouse gas emissions which are driving climate change.

10,668
Tonnes

CO₂eⁱ per \$1 million of market capitalisation

CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figure is a measure of the size of carbon reserves held by the fund's underlying companies.

707
Tonnes

CO₂e per \$1 million of sales

CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

Carbon emissions intensity describes the relationship between the carbon emissions of a company and its salesⁱⁱ.

NOTES

ⁱ Carbon dioxide equivalent (CO₂e) is a standard unit to compare the emissions of different greenhouse gases.

ⁱⁱ The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
