Performance for the R Inc unit class in GBP, launched on 23 May 2014. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund.

Past performance is not a guide to future returns. The value of your investment and any income taken from it is not guaranteed and may go up and down.

PERFORMANCE INFORMATION

This fund was launched on 24 May 2014 following a restructure of the previous property unit trust. The performance shown combines the past performance of this fund with the performance of the equivalent class in the previous property unit trust.

During the period following the EU referendum (June to September 2016) the manager applied fair value adjustments to the property values in the fund. The fair value adjustments marked down the value of the properties to reflect what the manager believed to be fair value of the properties until the valuation agent regained confidence in the property valuations.

KEY RISKS

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund could lose money if any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- If any of the markets in which you invest falls, the value of your investment in those markets will probably fall as well. In times of market uncertainty it may become less easy for your fund to buy and sell investments. If this happens, the value of your fund may fall and in extreme circumstances this may also force a delay in buying and selling your investment in the fund, which may mean you have to wait for your money to be invested or returned. The fund can only delay paying out if it is in the interests of all investors and with the permission of the fund trustee or depository.
- At times it may be difficult for the fund to make investments or sell assets to meet investors' requests to buy/sell shares. Where this occurs the fund may experience reduced investment performance for a period or have difficulty paying proceeds to investors who wish to sell shares.
- Property can be difficult to buy or sell. This could mean: cash builds up waiting to be invested, so the fund will underperform when property returns are greater than the interest earned; and/or property may have to be sold for less than expected.
- If an exceptional amount of withdrawals are requested, the fund manager may be forced to sell properties quickly. This could mean that properties are sold for less than expected which would reduce the value of your investment.
- If total requested withdrawals exceed 10% of the value of the fund, the Manager may defer withdrawals until the next working day.
- Rental growth is not guaranteed and unpaid rent could affect the performance of your investment.
- The value of property is generally a matter of valuer's opinion rather than fact and the true value of a property may not be recognised until the property is sold. In certain circumstances we may not be able to obtain a valuer's opinion and will apply our own valuation.
