

UK Treasury Bills Fund (charges included)

Unit-Linked Life Insurance Reported in GBP

FUND AIM

The fund aims to provide a low risk, highly liquid portfolio of UK Treasury Bills. Fund performance is shown relative to the benchmark however, the fund does not specifically target 7 Day GBP LIBID.

RISK AND REWARD PROFILE

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The risk indicator assumes you keep the product for less than one year. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

For more information, please refer to the Key Risks section on page 3.

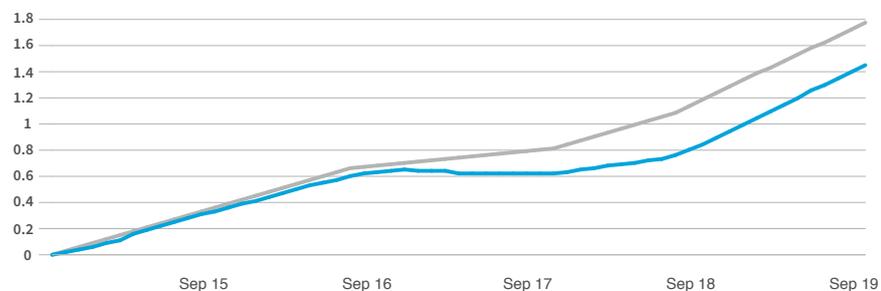

WHO IS THIS FUND FOR?

- The members of UK registered and certain non-UK registered defined benefit or defined contribution occupational pension schemes.
- There is no recommended minimum holding period.

ANNUAL PERFORMANCE (%)

12 months to 30 September	2019	2018	2017	2016	2015
Fund	0.58	0.24	-0.02	0.28	0.32
Benchmark	0.58	0.37	0.12	0.32	0.36
Relative	0.00	-0.13	-0.14	-0.04	-0.04

All performance periods over a year will be annualised. Source: LGIM. Performance based on daily close mid-market prices adjusted to include a deduction equivalent to our standard investment management fees, which may or may not be the same for your scheme. Please refer to your scheme literature, or to your scheme administrator, for the fee rate that applies to your scheme. **Past performance is not a guide to the future.**

FUND CHARACTERISTICS

The fund provides investors with a convenient and cost-effective facility to purchase UK treasury bills for their cash management requirements. The fund holds UK treasury bills with a maximum term to maturity of 2 months. UK treasury bills are highly liquid and are issued by the UK Debt Management Office (DMO) on behalf of HM Treasury. UK treasury bills assume the sovereign credit rating of the United Kingdom. For efficient cash management the fund may hold shares in the LGIM Sterling Liquidity Fund.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up. You may get back less than the amount you originally invested.
- The return from your investment is not guaranteed and therefore you may receive a lower or higher return than you anticipated. There will be a variation in performance between funds with similar objectives due to the different assets selected.
- PMC's charges and associated transaction costs are subject to change, with notice for the former and without notice for the latter. Charges and transactions costs deducted from the policy reduce your potential for capital growth in the future.
- Tax rules and the treatment of income and capital gains could change in the future and may be applied retrospectively.
- Inflation reduces the purchasing power of money over time as the cost of purchasing goods and services increases. If the rate of inflation exceeds the rate of return on your portfolio, it will erode the value of your portfolio and its investments in real terms.
- In extreme market conditions it may be difficult to realise assets held for a fund and it may not be possible to redeem units at short notice. We may have to delay acting on your instructions to sell or the price at which you cancel the units may be lower than you anticipated.
- The value of a fund's assets may be affected by uncertainties such as international political developments, market sentiment, economic conditions, changes in government policies, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investment may be made.
- PMC seeks to mitigate counterparty risk wherever possible on behalf of its policyholders through a variety of measures which include: each fund's non-cash assets being held with independent custodians, sweeping cash (where appropriate) overnight into the LGIM's range of Liquidity funds (above a deminimus level), using the delivery versus payment system when settling transactions and the use of central clearing for exchange traded derivatives and forward foreign exchange transactions. However, in the event of the failure of a counterparty, custodian or issuer there is a residual risk that a fund may suffer asset losses which are unrecoverable.
