

L&G Global High Yield Bond Fund

SICAV (UCITS compliant) P-Class EUR (Hedged) Dist

FUND AIM

The Fund aims to provide investors with a combination of growth and income.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to fluctuate.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for income or growth from an investment in fixed income securities
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you

All performance periods over a year will be annualised. Performance for the P EUR (Hedged) Dist share class in EUR, launched on 24 August 2018. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund. This fund has adopted a single swinging price, this means that on any given day the single dealing price will be set at either bid, offer or somewhere in between, based on whether there was a net inflow or outflow into or out of the Fund. The past performance depicted in this factsheet is based on that dealing price and therefore may appear more volatile than it would otherwise be if we were to show the notional bid or offer performance, this is as a result of the daily swing.

Past performance is not a guide to future returns. The value of your investment and any income taken from it is not guaranteed and may go up and down.

FUND SNAPSHOT

- Aims to produce high income and capital growth over the long term
- Searches the globe for leading credit opportunities
- Has a novel, macro-thematic approach, supported by focused credit research and a keen awareness of behavioural finance

FUND MANAGER COMMENTARY

The high yield market posted negative returns in December, as risk assets continued to be volatile. Tightening monetary conditions remain an important driver in markets, and a lack of soothing words from the US Federal Reserve was a key reason for the continued risk-off tone over the month. This was exacerbated by fragile commodity markets, with a particular focus on oil prices – much of the market weakness was focused on energy-sensitive names.

Early in the month we continued to reduce our exposure to single B names in Europe. We see greater downside risk here and are now underweight relative to the benchmark in European high yield. Regionally, they the fund has moved from being marginally underweight to marginally overweight in North America, where we continue to see robust economic growth. We are now neutral on emerging markets where credit quality is improving and valuations are attractive.

Looking ahead, we see a tougher economic environment in Europe, although there remains the likelihood of reasonable growth in the US. As a result, the number of defaults seems likely to rise in Europe and will likely be materially higher than in the US.

MARTIN REEVES

Martin Reeves is Head of Global High Yield. Prior to joining LGIM in 2011, Martin ran Credit Research at AllianceBernstein where he had worked since 1998. Prior to Alliance Bernstein Martin was Head of US High Yield Research at UBK Asset Management and a Chartered Accountant with Ernst & Young. Martin holds an MA in Economics from Cambridge University, St Catharine's College.

KEY RISKS

- This fund holds bonds that, rather than being traded on an exchange, are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments that are traded on an exchange and on any particular day there may not be a buyer or a seller for the bonds. In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for your fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the fund trustee or depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your fund may fall.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Any such investments will be impacted by exchange rate fluctuations and this may affect the value of your investment and any income from it. Currency hedging techniques may be applied to reduce the impact of exchange rate fluctuations but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low interest rate environment. Bonds with a short time to go before their maturity date will fall by less than bonds with a longer time to their maturity date.
