

Legal & General UK Smaller Companies Trust

Unit Trust (UCITS compliant) I-Class GBP

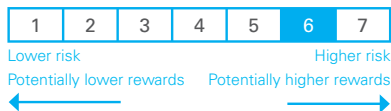

Base currency: **GBP**

Domicile: **UK**

FUND AIM

The objective of this Fund is to provide growth above that of the Numis ex-Investment Trusts Index Net TR, the "Benchmark Index". The Fund aims to outperform the Benchmark Index by 3% per annum. This objective is before the deduction of any charges and measured over rolling three year periods.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for a more specialist investment providing growth from an investment in shares of UK companies that make up the lowest 10% by capitalisation on UK stock markets.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

ROD OSCROFT

Rod joined LGIM in 2000 and has been the Fund Manager for the UK Smaller Companies Trust since August 2013. He focuses on UK small and mid-cap funds which are typically concentrated, conviction weighted, benchmark agnostic portfolios. In Q3 2016, he was appointed co-head of Active Equity alongside Nick Hartley. Rod joined LGIM from Hermes Investment Management where he specialised in small company research. Prior to this, Rod worked in the transport asset rental industry. He graduated from Cambridge University with an Honours degree in Economics.

ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO₂) is the most significant contributor to greenhouse gas emissions which are driving climate change.

0
Tonnes

CO₂eⁱ per \$1 million of market capitalisation

CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figure is a measure of the size of carbon reserves held by the fund's underlying companies.

77
Tonnes

CO₂e per \$1 million of sales

CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

Carbon emissions intensity describes the relationship between the carbon emissions of a company and its salesⁱⁱ.

NOTES

ⁱ Carbon dioxide equivalent (CO₂e) is a standard unit to compare the emissions of different greenhouse gases.

ⁱⁱ The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The fund invests in smaller companies. Investments in smaller companies tend to be riskier than investments in larger companies because they can: be harder to buy and sell; or go up and down in value more often and by larger amounts, especially in the short term. In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for your fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the fund trustee or depository.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
