

# L&G ESG Emerging Markets Government Bond (Local Currency) Index Fund

ICAV (UCITS compliant) Z-Class GBP (Unhedged) Acc

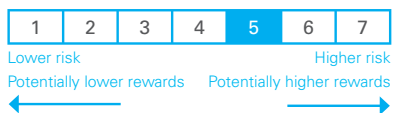

Base currency: USD

Domicile: Ireland

## FUND AIM

The investment objective of the Fund is to provide investors with a return in line with the Emerging Markets government bond market, as represented by the JPMorgan ESG GBI-EM Global Diversified Local Currency Index (the "Index").

## RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 5 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to fluctuate.

For more information, please refer to the Key Risks section on page 3.

## WHO IS THIS FUND FOR?

- This fund is designed for investors seeking income or growth from an investment in Emerging Markets government bonds denominated in the national currency of the issuer
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you

## FUND FACTS

## PERFORMANCE (%)

	1m	3m	1y	3y	Launch
■ Fund	6.94	0.47	3.25	-	-
■ Index	7.16	0.66	3.62	-	-
Relative to Index	-0.22	-0.19	-0.37	-	-

## FUND SNAPSHOT

- **What does it invest in?** Invests primarily in bonds issued in the relevant national currency by governments of developing countries as determined by the index. These bonds will be a mixture of sub-investment grade (higher risk), investment grade (lower risk) and non-rated bonds. The index includes only bonds that meet the index provider's socially responsible investing ("SRI") requirements and environmental, social and governance ("ESG") rating criteria. The Fund may also use derivatives.
- **How does it invest?** Passively managed, aiming to replicate the performance of the index.

### INDEX FUND MANAGEMENT TEAM

The Index Fund Management team comprises 25 fund managers, supported by two analysts. Management oversight is provided by the Global Head of Index Funds. The team has average industry experience of 15 years, of which seven years has been at LGIM, and is focused on achieving the equally important objectives of close tracking and maximising returns.

**KEY RISKS**

- The value of an investment is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- This fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- This fund invests in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: may not be as well regulated; may be more difficult to buy and sell; may have less reliable arrangements for the safekeeping of investments; or may be more exposed to political and taxation uncertainties. The value of the fund can go up or down more often and by larger amounts than funds that invest in developed countries, especially in the short term.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from the currency of this share class. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- We may take some or all of the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
