

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Legal & General Real Capital Builder Fund Class C Accumulation - ISIN: GB00BF5DV501

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

### OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to grow capital, at the rate of inflation (CPI (UK Consumer Prices Index)) +4% per annum on average over a rolling five year period and to manage volatility so that it remains around 66% of the MSCI World Index. This objective is before the deduction of any charges and assumes any income is reinvested. There is no guarantee that the objective will be met over any time period and capital is at risk.
  - The Fund seeks to achieve capital growth by investing at least 50% in shares of companies and depositary receipts from any region of the world, including emerging markets, and in any currency.
  - Over a market cycle (typically 3 to 5 years), the fund will hold on average, shares in 20 to 40 companies selected by the Manager following research of each company. At times the funds portfolio of company shares may be concentrated.
  - The Fund will also invest in bonds and any other fixed income securities (types of loan that pay interest) to help manage volatility and to protect capital.
  - The bonds the Fund will invest in may have a fixed or variable rate of income. The bonds that the Fund invests in may be investment grade (rated as lower risk) or sub-investment grade (rated as higher risk). Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
  - The bonds that the Fund invests in may be issued by companies or governments and may be issued in the UK or overseas.
  - The Fund may also invest in participatory notes, preference shares, cash, deposits, money market instruments (such as treasury bills), real estate investment trusts (REITs) and collective investment schemes, including those which are managed or operated by the Manager or an associate of the Manager.
  - In addition, the Fund is also permitted to receive and hold warrants and convertible bonds as a result of corporate actions.
  - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
    - reduce risk or cost; or
    - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to select investments to achieve the Fund's objectives.
  - Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
  - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
  - The Fund's base currency is denominated in sterling (British pounds).
  - This Fund is designed for investors looking for growth through exposure to a portfolio of shares in companies and bonds with lower portfolio volatility than a typical equity portfolio in absolute terms.
  - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
  - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
  - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

### RISK AND REWARD PROFILE

Lower risk ← → Higher risk  
Potentially lower rewards Potentially higher rewards

|   |   |   |   |   |   |   |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 5 because the mix of different asset types in which the Fund invests has a balancing effect on the rate at which the Fund share price moves up and down. This type of fund is generally considered to be higher risk than one investing only in bonds and lower risk than one existing only in company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at [www.legalandgeneral.com/reports](http://www.legalandgeneral.com/reports).

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.

- This Fund holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the Fund may not be able to sell bonds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The return from this Fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the Fund.
- The Fund is a Target Return fund. This type of fund tries to increase the value of your investment over a period of time, in both rising and falling markets. However, there is no guarantee of returns. You may not get back the money you invest. Target Return funds use a range of different types of investment strategies and may use derivatives. It is possible that the value of these funds could go down when the market is rising, or may not rise as quickly.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

## CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

### One-off charges taken before or after you invest

|                     |       |
|---------------------|-------|
| <b>Entry charge</b> | 0.00% |
| <b>Exit charge</b>  | 0.00% |

This is the maximum that might be taken out of your money before it is invested.

The price for buying and selling units is subject to a Dilution Adjustment See opposite.

### Charges taken from the fund over a year

|                       |       |
|-----------------------|-------|
| <b>Ongoing charge</b> | 0.50% |
|-----------------------|-------|

### Charges taken from the fund under certain specific conditions

|                        |      |
|------------------------|------|
| <b>Performance fee</b> | None |
|------------------------|------|

- There are no entry or exit charges.
- The ongoing charges figure is based on the latest available expenses at December 2020. This figure may vary from year to year.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the income of the Fund.

#### Other costs:

- **Dilution Adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'. This can vary but as an example for this Fund we estimate 0.23% for purchases and 0.19% for sales at 28 January 2021. The amount of the dilution adjustment may differ in future.
- For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at [legalandgeneral.com/chargesandfees](http://legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British Pounds).
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2017.
- This unit class launched in 2018.
- The Fund aims to outperform the rate of inflation (CPI (UK Consumer Prices Index)) by 4% per annum (referred to as the "Benchmark" in the chart opposite) on average over a rolling five year period and to manage volatility so that it remains around 66% of the MSCI World TR Net Index. This objective is before the deduction of any charges.
