

Legal & General Emerging Markets Government Bond (Local Currency) Index Fund

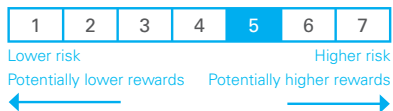

Unit Trust (UCITS compliant) I-Class GBP

FUND AIM

The objective of this fund is to provide a return in line with the performance of the JPMorgan GBI-EM Global Diversified Local Currency Index.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

This fund is in Category 5 because it invests in bonds issued by the governments of developing countries. These generally provide higher rewards and higher risks than other investments such as cash and investment grade bonds issued by governments of developed countries and lower rewards and lower risks than investments in company shares.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors seeking income from a specialised investment which can form part of their existing savings portfolio
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you

INDEX FUND MANAGEMENT TEAM

The Index Fund Management team comprises 25 fund managers, supported by two analysts. Management oversight is provided by the Global Head of Index Funds. The team has average industry experience of 15 years, of which seven years has been at LGIM, and is focused on achieving the equally important objectives of close tracking and maximising returns.

KEY RISKS

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from Sterling (British Pounds). Any such investments will be impacted by exchange rate fluctuations and this may affect the value of your investment and any income from it. Currency hedging techniques may have been applied to reduce the impact of exchange rate fluctuations but may not entirely eliminate it.
- Investment returns on bonds are particularly sensitive to trends in interest rate movements. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low interest rate environment. Bonds with a longer time to go before their maturity date will fall by more than bonds with a short time to their maturity date.
- Credit ratings assigned to the individual assets in the fund can weaken and cause the value of those assets to fall.
- The fund invests in bonds which are issued by governments. If these governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your fund may fall.
- This fund invests in countries where investment markets are considered to be less developed. This means that investments are generally riskier than those in developed markets because they: may not be as well regulated; may be more difficult to buy and sell; may have less reliable arrangements for the safekeeping of investments; or may be more exposed to political and taxation uncertainties.
- The value of the fund can go up and down more often and by larger amounts than funds that invest in developed countries, especially in the short term.
- The fund could lose money if any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- We take the ongoing charges from the fund's capital rather than the fund's income. This increases the amount of income you may be paid, but it reduces the growth potential and may lead to a fall in the value of the fund.
