

Legal & General All Stocks Gilt Index Trust

Unit Trust (UCITS compliant) I-Class GBP

FUND AIM

The objective of this fund is to provide a combination of income and growth (if the income is reinvested) by tracking the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

The fund is in category 4 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to fluctuate.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for income and growth from an investment in bonds (a type of loan which pays interest) issued by the UK government (known as gilts).
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

FUND FACTS

Fund size £989.1m	Base currency GBP	Benchmark FTSE Actuaries UK Conventional Gilts All Stocks	
Launch date 8 Mar 1981	Domicile UK	Distribution yield 1.3%	Modified duration 11.10 years

Fund	0.27	1.61	9.54	0.02	13.07
Benchmark	0.57	1.83	10.10	0.57	13.86

Performance for the I Inc unit class in GBP, launched on 20 December 2012. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund.

Please note, the benchmark is priced at the close whereas the fund is priced earlier. This can lead to artificially high tracking difference stated on the factsheet. Please see overleaf for gross tracking difference with both fund and index on a closed-price basis.

Past performance is not a guide to future returns. The value of your investment and any income taken from it is not guaranteed and may go up and down.

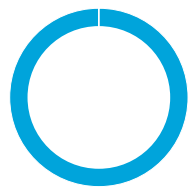

FUND SNAPSHOT

- Aims to track the return of the FTSE Actuaries UK Conventional Gilts All Stocks Index
- Invests in government bonds issued by the UK government
- Employs a straightforward, low-cost and pragmatic index replication approach

INDEX TRACKING

The team believes that successful index tracking strikes a balance between close matching of the index and the management of trading costs. Using pragmatic replication, all the bonds in the portfolio are held broadly in line with their index weights, ensuring close tracking of the index.

TRACKING ERROR (%)

3 years	4 years	5 years	7 years	10 years	Launch
0.00	0.00	0.00	0.00	0.00	0.00

The tracking error figures shown are calculated using gross of fee returns based on LGIM's internally calculated valuations. The gross of fee performance figures are calculated on a total return basis and have been adjusted to exclude the impact of uninvested cash balances within the income and revenue account. The gross performance numbers are an indication of fund manager skill and are not reflective of true fund performance. True fund performance priced at official valuation points are calculated by Lipper and available above. Please note that on occasion, difference in the treatment of withholding tax between fund and benchmark can be significant and lead to the appearance of heightened relative returns on overseas equity funds. The fund launched on 08 March 1981.

INDEX FUND MANAGEMENT TEAM

The Index Fund Management team comprises 25 fund managers, supported by two analysts. Management oversight is provided by the Global Head of Index Funds. The team has average industry experience of 15 years, of which seven years has been at LGIM, and is focused on achieving the equally important objectives of close tracking and maximising returns.

KEY RISKS

- This fund holds bonds that, rather than being traded on an exchange, are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments that are traded on an exchange and on any particular day there may not be a buyer or a seller for the bonds. In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for your fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the fund trustee or depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your fund may fall.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- We may take some or all of the ongoing charges from the fund’s capital rather than the fund’s income. This increases the amount of income, but it reduces the growth potential and may lead to a fall in the value of the fund.
- Investment returns on bonds are sensitive to trends in interest rate movements. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low interest rate environment. Bonds with a short time to go before their maturity date will fall by less than bonds with a longer time to their maturity date.
