## UK and European product list

February 2022

Technological, social and demographic forces are creating new investment opportunities and risks globally.

Just as changes to our world are accelerating, investors' needs and expectations are also shifting. This requires asset managers to respond with improved solutions in order to generate better long-term outcomes.

At L&G ETF, we offer solutions that seek to capture the opportunities, and mitigate the risks, of the rapidly shifting investment environment. Unmanaged risks – from those specific to markets such as liquidity and crowding, to those connected to environmental, social and governance considerations – can destroy long-term value.

We develop these solutions by listening to our investors, while conducting rigorous research and deploying expertise in index design. Our industry-leading thematic and redefined core ranges demonstrate our approach in action.

Looking ahead, we are utilising LGIM's expertise, capabilities and scale to bring our solutions to more investors across Europe.

### Key risk

The value of an investment and any income taken from it is not guaranteed and can go down as well as up, you may not get back the amount you originally invested
