KEY RISKS

- The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- The fund invests in smaller companies. Investments in smaller companies tend to be riskier than investments in larger companies because they can: be harder to buy and sell; or go up and down in value more often and by larger amounts, especially in the short term. In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for your fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the fund trustee or depository.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
