

Legal & General UK Special Situations Trust

Unit Trust (UCITS compliant) C-Class GBP

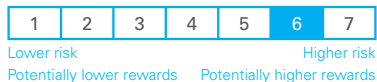

Base currency: **GBP**

Domicile: **UK**

FUND AIM

The objective of the Fund is to provide growth above that of the FTSE All Share TR Net Index, the "Benchmark Index". The Fund aims to outperform the Benchmark Index by 5% per annum. This objective is before the deduction of any charges and measured over rolling three year periods.

RISK AND REWARD PROFILE

The synthetic risk and reward indicator (SRRI) is based on the historic volatility of the fund's value and it may change in the future.

This fund is in category 6 because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds, cash or commercial property.

For more information, please refer to the Key Risks section on page 3.

WHO IS THIS FUND FOR?

- This fund is designed for investors looking for a more specialist investment providing growth from an investment in shares of UK companies which are considered undervalued due to their special situation.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- This fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

For annual performance against the performance objective please see the Key Investor Information Document (KIID). Performance for the C Inc unit class in GBP, launched on 12 December 2017. Source: Lipper. Performance assumes all fund charges have been taken and that all income generated by the investments, after deduction of tax, remains in the fund.

Past performance is not a guide to the future.

Due to UK bank holiday on 31 August 2020, fund returns shown are based on prices at 28 August 2020 (last fund trading day for August 2020). This may impact relative performance to any benchmarks which priced on 31 August 2020.

FUND SNAPSHOT

- **What does it invest in?** Invests at least 80% in shares of UK companies which are considered to be undervalued by the market, where the Manager believes there to be a catalyst (a feature or market event) which should increase the value of the company.
- **How does it invest?** Actively managed, with holdings in between 30 and 60 companies on average over a typical market cycle of 3-5 years, which means the fund may be concentrated at times.

FUND MANAGER COMMENTARY

The steady march higher for equity markets continued in August despite government bond yields grinding higher. Policy support remains favourable for equity investors, though economic recovery momentum appears to have stalled and COVID-19 cases continue to intermittently spike and decline around the world.

The FTSE All Share Index reported a gain of +2.4%, which reflected relative underperformance against global indices. UK equity valuations are undemanding, though Brexit worries persist and market bias towards value sectors has not been helpful year-to-date (YTD). For sector performance, consumer services, industrials and technology led returns. Utilities, healthcare and energy industries were all weak in the period.

The L&G UK Special Situations fund delivered a positive return of +3.9% in August. The portfolio benefitted from its overweight allocation to consumer services and its underweight positioning to consumer goods, healthcare and utilities. For stock selection, consumer services names all performed strongly on the back of positive vaccine data and expectation that business and consumer behaviours would start the long process of returning to normal. At a stock level, within this sector both SSP Group and Gym Group were notable contributors as they recovered some of their weak performance experienced YTD. Outside of these names, positive performance was driven by robotic automation business, Blue Prism, which is benefitting from an increased awareness of its product solutions. Cairn Energy also performed well, as it announced the sale of a key development asset which creates balance sheet flexibility and de-risks the investment case, in our view.

ROBERT WHITE

Robert joined LGIM in 2018 as a Fund Manager for the UK Special Situations Trust. Prior to this Robert worked at Mirabaud Asset Management where he was an Assistant Fund Manager (2013 to 2018) on the UK Equities Core product. Before that he worked at PWC in their Transaction Services division. In total he has over 10 years experience working within financial services. He read Philosophy, Politics and Economics at Pembroke College, Oxford and is a member of the Institute of Chartered Accountants in England and Wales.

ENVIRONMENTAL PERFORMANCE

Carbon dioxide (CO₂) is the most significant contributor to greenhouse gas emissions which are driving climate change.

4,275
Tonnes

CO₂eⁱ per \$1 million of market capitalisation

CARBON RESERVES

Carbon reserves are fossil fuels (coal, oil and gas) which, if burnt, will become the carbon emissions of the future. To meet global climate change targets, the unabated use of fossil fuels is expected to decline over time.

The figure is a measure of the size of carbon reserves held by the fund's underlying companies.

62
Tonnes

CO₂e per \$1 million of sales

CARBON EMISSIONS

Following the global Paris Agreement on climate change, companies in all sectors are expected to reduce their emissions to prepare and adapt for a low-carbon economy.

Carbon emissions intensity describes the relationship between the carbon emissions of a company and its salesⁱⁱ.

NOTES

ⁱ Carbon dioxide equivalent (CO₂e) is a standard unit to compare the emissions of different greenhouse gases.

ⁱⁱ The choice of this metric follows best practice recommendations from the **Task Force on Climate-related Financial Disclosures**.

KEY RISKS

- The value of an investment and any income taken from it is not guaranteed and can go down as well as up; you may not get back the amount you originally invested.
- The return from this fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the fund.
- The fund could lose money if any institution providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from sterling (British pounds). Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
